Astronomy

ASTR-C1001: Introduction to Astronomy
This course introduces fundamental concepts of astronomy, including the Solar System, stars, supernovae, galaxies, black holes, and the expanding universe. Students learn how to study the cosmos and what the latest discoveries reveal about the origins and fate of the universe. (Formerly ASTRON 150)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

BIOL-C1000: Introduction to Biology with Lab
This combined lecture and laboratory course provides the non-biology major with an introduction to living things and their environment. Students use experimentation and investigation to develop important critical thinking skills. Students learn about the process of science, the building blocks of life, the role and regulation of DNA, how populations change over time, the movement of energy within and between life forms, and how species interact with each other and their surroundings. By the end of the course, students will be able to apply an understanding of biological concepts to current issues and their impacts on society. (Formerly BIOL 100)

ESLN 604 is the last course in a four-course noncredit English as a Second Language series designed to develop learners? everyday English proficiency and academic literacies. Course may be repeated. For advanced learners of the English language. Learners build on advanced English skills and vocabulary as well as apply critical thinking in navigating a variety of everyday English and academic contexts. Learners will read and analyze a variety of texts, including book length work and 1-2 academic articles; develop the practice of reading texts closely and focus on significant details and patterns by noticing rhetorical and stylistic choices of authors; write clear, well-organized, and well-developed compositions, including multimodal composition, that integrate the ideas of others while appropriately crediting the original authors and maintaining academic integrity; conduct advanced library searches; enhance computer and tech literacies; continue to learn about campus services and resources as well as gain more opportunities to participate in the larger campus culture and beyond.
Credit Type: Noncredit course.
Departmental Recommendation: It is highly recommended that students entering this course be able to read a range of texts and write multi-page compositions in English.

GEOG-110H: Physical Geography-Honors
A spatial study of Earth's dynamic physical systems and processes. Topics include Earth-sun relationships, the atmosphere, weather and climate, water and the hydrosphere, geomorphology and landforms, soils and their distribution, biogeography and tectonics and the associated landforms. Emphasis is on interrelationships among systems and processes and their resulting patterns and distributions. This course includes content and experiences appropriate for students wishing to earn honors credit.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: Acceptance into the College Honors Institute.
Departmental Recommendation: Concurrent enrollment in GEOG 111 or GEOG 111H.

Note: Once registered for the class, students will need to complete the online class that will take approximately 3 hours. Since this is a blended learning course, a student completes part of the course in a self-directed manner online, followed by a hands-on skills session in person with an ARC Instructor. ARC eLearning courses are fully self-directed, and do not require a separate hands-on skills session. The materials needed to be completed will be e-mailed to them to their Crafton's email address from the American Red Cross. Once students have completed this portion, the instructor will be notified. This must be done before the beginning of the class.

History

HIST-107: Native Peoples of North America
This course explores the anthropology of Native Americans from prehistory to the present. Utilizing an anthropological and Native American Studies perspective, we examine sociocultural issues relevant to Native Americans such as economics, language, religion, identity, politics, and cultural change. Special attention will be given to the contributions of Native Americans to the field of anthropology and to the broader culture of the United States. Emphasis will also be placed on the impact of European colonialism and on contemporary issues such as discrimination, the struggle for sovereignty, and land rights. Addresses the contemporary status of native cultural traditions taking into account social change and adaptation. This course is also offered as ANTHRO 107 and HIST 107.

Marketing

MARKET-100: Introduction to Marketing Principles
Introduction to marketing principles course is designed to serve as an introduction to the basic principles of marketing, practices, and the application of these practices. This course examines our present-day marketing system from a managerial point of view and has a current events component to help emphasize the marketing principles in today?s business world. Subjects covered include consumers, market research and target markets, feasibility analysis, products, promotion, channels of distribution, pricing, international marketing and use of technology in marketing.

Mathematics

MATH-902: College Algebra Support
A review of the core prerequisite skills, competencies, and concepts needed in college algebra. Topics include: a review of computational skills developed in intermediate algebra, factoring, operations on rational and radical expressions, absolute value equations and inequalities, functions including composition and inverses, and an in-depth focus on quadratic functions. This course is appropriate for students who are confident in their graphing and beginning algebra skills. Graded on a Pass/No Pass basis only. Non-degree applicable
Credit Type: Earned units for this course are NOT applicable to an Associate Degree.
Grading Restriction: Graded on a Credit/No Credit basis only.
Prerequisite: MATH 095 or eligibility for MATH 902 as determined through the Crafton Hills College assessment process.
Corequisite: MATH 102.

STAT-C1000H: Introduction to Statistics - Honors
This course is an introduction to statistical thinking and processes, including methods and concepts for discovery and decision-making using data. Topics include descriptive statistics; probability and sampling distributions; statistical inference; correlation and linear regression; analysis of variance, chi-squared, and t-tests; and application of technology for statistical analysis including the interpretation of the relevance of the statistical findings. Students apply methods and processes to applications using data from a broad range of disciplines. This is an honors course. (Formerly MATH 110H)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: Placement as determined by the college's multiple measures assessment process or completion of a course taught at or above the level of intermediate algebra.
Alternate Listing: This course is also offered as STAT-C1000.

Microbiology

MICRO-102: Introductory Microbiology
Introduction to microbiology, emphasizing the general characteristics of microorganisms, principles of microbial growth, identification, control and the relationships between human beings and microbes. Special attention is given to infectious diseases. Recommended for students in health occupations. Surveys of bacteria, fungi, viruses and parasitic protozoans are included.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU. Limited transfer to UC; contact a counselor for details.
