ACCT-600: Volunteer Income Tax Assistance Program (VITA)
This noncredit course combines theory and practical application, allowing students to assist low-income and elderly citizens with tax preparation under the supervision of a CPA or licensed tax preparer. Through participation in the IRS-sponsored Volunteer Income Tax Assistance (VITA) program, students gain hands-on experience in individual income tax preparation. This course emphasizes understanding tax law, IRS guidelines, client service, professionalism, and ethics. By providing free tax services to underserved communities, students gain valuable career skills while engaging in meaningful civic service.
Credit Type: Noncredit course.
Grading Restriction: Graded on a Credit/No Credit basis only.
Limitation on Enrollment: Prior to enrolling in this course,.
Students Must Obtain the Irs Certificates: Volunteer Standards of Conduct Certification, Intake/Interview and Quality Review Certification, and Advanced tax Certification.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.

ADJUS-156: Probation and Parole
This course is a study of the historical and contemporary view of the application of probation and parole procedures in the criminal justice system. The impact of SB 823, abolishing the Division of Juvenile Justice (DJJ), and in SB 92 which institutes county realignment for previous DJJ youth is examined. This course material will broaden the student concept of community corrections and the rights and liabilities of a person on probation or parole. (Formerly CORREC 106)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: Eligibility for college level English based on the SBVC Guided Self-Placement process.

AERO-022L: Private Pilot Flight Lab
This course provides students with the opportunity to accumulate flight hours essential for obtaining certification and licensing as a commercial instrument pilot. It focuses on training in specific areas to develop proficiency in essential pilot operations required for various certificates and ratings. All instruction follows the guidelines set forth by the Federal Aviation Regulations (FAR) Part 61 and Part 141. Flight training labs adhere to an approved FAR Part 141 curriculum.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Prerequisite/Corequisite: AERO 022.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.

AERO-041L: Instrument Pilot Flight Lab
Students taking this course will receive training in the maneuvers and procedures necessary to meet the standards contained in the FAA Instrument Rating Practical Test Standards. Additionally, students will receive training in safety awareness, crew resource management, and aeronautical decision-making. At the successful completion of this course, students will have gained the aeronautical experience necessary to attain the addition of an Instrument Rating for the Private Pilot Certificate. This course is offered as pass/no-pass basis only.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Grading Restriction: Graded on a Credit/No Credit basis only.
Prerequisite/Corequisite: AERO 040.
Limitation on Enrollment: Students must receive approval to enroll in this course from an Aeronautics faculty member.

AERO-047: Commercial Pilot Ground School
This course examines the fundamentals of commercial flight in the Air Traffic Control (ATC) system and factors that can affect the operation, including aerodynamics, navigation, flight planning, and communication. The content is reinforced by concurrent enrollment in AERO 047L. This course will meet the Federal Aviation Administration (FAA) requirements for the ground instruction portion for a commercial pilot certificate as specified in Federal Aviation Regulations (FAR) 61.56. The student will receive necessary aeronautical knowledge and ground training to meet the prerequisites specified in Appendix D to 14 CFR Part 141 and CFR Part 61.124 to successfully pass the commercial pilot airman knowledge test.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Prerequisite: AERO 022 and AERO 022L and AERO 040 and AERO 041L.
Prerequisite/Corequisite: AERO 047L.

AERO-070: Introduction to Air Traffic Control (ATC)
This course is an introductory course in air traffic control and is a requirement for all students in the Flight Operations - ATC Pathway (degree) sequence. The course material covers a broad range of topics specific to the air traffic control system and its application to the aviation profession. Topics included are the history of air traffic control (ATC), National Airspace System (NAS), navigation systems, ATC systems and airspace, ATC communications, ATC procedures and organization, tower, TRACON and en route operations, NextGen and the future of the national airspace system.
Credit Type: Earned units for this course are applicable to an Associate Degree.

Note: This section meets at District Pro. Dev. Center in San Bernardino. (See Building and Location section of the printed schedule for the address.)

AERO-072: ATC Phraseology
This course introduces students to the standard phraseology and communication techniques used in Air Traffic Control (ATC). Students will learn proper radio communication procedures, terminology, and phraseology as outlined by the Federal Aviation Administration (FAA). Emphasis will be placed on effective communication between pilots and air traffic controllers in a variety of flight scenarios, including ground operations, departures, en route, and arrivals. The course is designed for students pursuing aviation careers, including pilots and future air traffic controllers, and aims to enhance communication safety and proficiency in airspace management.
Credit Type: Earned units for this course are applicable to an Associate Degree.

AERO-661: Remote Pilot sUAS Part 107 Prep
This noncredit course is designed to prepare students for the FAA's Part 107 exam. Commercial drone pilots must obtain a Remote Pilot Certificate to legally operate drones for commercial or for-profit purposes. This course will include detailed and in-depth explanation of FAA Part 107 regulations, airspace classification, operating requirements, and flight restriction. We will also cover weather and micrometeorology. Upon completion of this course, students will be prepared for the FAA exam and have a thorough understanding of the safe and responsible drone operation.
Credit Type: Noncredit course.
Grading Restriction: Graded on a Credit/No Credit basis only.

ASL-110: American Sign Language II
The course is second in a series of four ASL courses designed for the student to develop proficiency in ASL usage. Students continue to develop basic conversational skills with emphasis on expanding vocabulary and comprehension/production skills. There are four basic categories: cultural awareness, grammatical features, vocabulary development, and conversational skills.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: ASL 109.

Note: This is a fully online class. Students will be required to complete online instructional content via Canvas. This class could offer some live online meetings, but students will have options on accessing that content. Students should log on to Canvas the first day of class to access classes.

ANTH-C1001: Introduction to Biological Anthropology
In this course, students examine human origins, evolution, and variation with a focus on the adaptations of humans and other primates. Biological evolution and scientific methods are foundations for the course. (Formerly ANTHRO 106)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: READ 100.

Arabic

ARAB-101: College Arabic I
This course includes the study of essentials of Modern Standard Arabic (MSA) including pronunciation, the Arabic alphabet, symbols and sounds, vocabulary, idioms, and grammatical structures along with an introduction to the key social issues and culture of Arabic-speaking people. This course corresponds to two years of high school study.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

ARAB-102: College Arabic II
In this course students continue to develop the ability to converse, read and write in Modern Standard Arabic. The course includes the study of essentials of pronunciation, vocabulary, idioms, and grammatical structures along with an introduction to the key social issues and culture of Arabic speaking people.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: ARAB 101.

Architecture

ARCH-102: Digital Design Media Level I
This course introduces students to the fundamentals of representing architectural design. The class focuses on architectural drawing conventions, and uses standard architectural software to draft, document, and represent a three-dimensional design through two-dimensional drawings. Attention is drawn to the relationship between technical and presentation drawings, and the course explores and analyzes architectural presentation principles and techniques. This class introduces students to Adobe CS and AutoCAD software.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

Note: 12 week class from 02/16/27 to 05/13/27.
Note: This is a fully online class. Students will be required to complete online instructional content via Canvas. This class could offer some live online meetings, but students will have options on accessing that content. Students should log on to Canvas the first day of class to access classes.

ARCH-103: Architectural Rendering and Visual Communication
This course serves as an introduction to three-dimensional digital modeling using three-dimensional software, and focuses on how to visually communicate design intent through a series of architectural drawings and diagrams. Different types of renderings and three-dimensional views are introduced, and resulting projects are presented using layout software. This class introduces students to Adobe CS and three-dimensional software, including Revit and Rhino.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

Note: This is a synchronous course. Students registered in this course will be required to log in and be present for the days and times listed. You will be live online with the instructor for all class meetings.

ARCH-104: The Built Environment: Culture, Profession, and Urbanization
This course surveys the built environment throughout history and across different cultures and geographies worldwide. Emphasis is on the role of architecture, and allied disciplines such as urban design and planning, in enabling colonial expansion and domination of non-western cultures. This historical survey ends with an assessment and understanding of contemporary architectural practice, along with licensing pathways and academic and professional trajectories.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

Note: This is a fully online class. Students will be required to complete online instructional content via Canvas. This class could offer some live online meetings, but students will have options on accessing that content. Students should log on to Canvas the first day of class to access classes.

ARCH-105: Design Theories, Methods, and Visualizations
This course introduces students to the process of architectural design, exploring the built environment through different media and activities that address distinct design approaches. It includes studies of various representation techniques, media, and processes to express different design philosophies, and an introduction to the tools, techniques, and methods relevant to the design process. The course introduces students to the various scales of architectural intervention, from the dimensions of the human body all the way to the territory of the city.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

ARCH-113: Design Studio II
This is a second-level architectural design studio with a focus on site analysis, design conceptualization and form-making, program development, and deep considerations of environmental and cultural contexts. Emphasis is on critical thinking and problem-solving through design, integrating an understanding and articulation of the role of architecture in addressing environmental, social, and climatic inequalities. Design investigations will focus on a public/cultural institution and will utilize digital software to focus on overall design strategies, structural systems, materials, space, light, and a corresponding set of project representations and physical models.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H and ARCH 103.

ARCH-146: History of Architecture: Renaissance through Modern
This is a survey course that covers the indigenous architecture in the Pre-Columbian Americas and

the Western architectural history Renaissance period to modern times. This course includes a comparative study of architecture and architects with an emphasis on people, locations, structures, materials, and methods of construction.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

ARCH-203: Advanced Digital Media and Algorithmic Design
Tools that are available to model design parametrically will be introduced in this class to illustrate the construction of geometrical relationships among complex shapes. Focus is on hands-on techniques that can be applied to the design process, to extend the efficiency and productivity of design work. Using design mathematics and computational definitions, students will develop digital models that they will translate into physical models. This class builds on student's existing knowledge of Rhino, furthering their skills in three-dimensional modeling and introduces students to rendering practices.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: ARCH 103.

ART-121: Three-Dimensional Design
This course is a study in the elements and principles of three-dimensional design. The focus is on concepts and their application with regards to spatial relationships and composition. Experimentation is in natural and synthetic materials such as but not limited to paper, clay, wood, plaster, and metal.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ART 120 and ENGL C1000 or ENGL C1000H.

Note: 14 week class from 02/02/27 to 05/13/27.
Note: This class will require some independent time in the art lab each week.

ART-124A: Beginning Drawing
The course is a progressive study of form, space, and concept employing a wide range of subject matter and traditional drawing media. Instruction focuses on perceptually based drawing, observational abilities and creative responses to traditional drawing materials and subject matter. Topics include the theory and analysis of perspective in two- and three-dimensional composition such as the various means of representing three-dimensional forms in space through aerial and linear perspective.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

ART-126A: Beginning Painting
The course is a progressive study of the fundamentals of painting and painting materials including techniques of composition, color theory, brushwork, and technique, as well as creative responses to materials and subject matter. Topics include the appropriate use of traditional color theory with artistic brush application on prepared surfaces.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.

ART-126B: Intermediate Painting
This course is a review of essential concepts and skills of painting and the development of intermediate-level painting skills. Development of original concepts for painting and the study of complex subject matter, advanced compositional concerns, using alternative and experimental surfaces and media.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: ART 126A.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

ART-132A: Beginning Life Drawing
The course is an introduction to drawing the human figure and anatomy from observation using a wide variety of drawing media and techniques. Topics include an introduction to human anatomy, contour, proportions, gesture, and the historical and contemporary roles of figure drawing in the visual arts. Students in this course will learn both descriptive and interpretive approaches to drawing the figure. Drawings are based on a live nude model.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

Note: 14 week class from 02/01/27 to 05/12/27.

ART-132B: Intermediate Life Drawing
This course is a review of essential concepts of figure drawing and development of intermediate-

level figure drawing skills with an emphasis on accurate analysis of anatomy, essential structure and further use of traditional and non-traditional drawing materials and surfaces. The student will develop a portfolio of completed figure drawings with an emphasis on the study of advanced compositional concerns. Drawings are based on a live nude model.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: ART 132A.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.

Note: 14 week class from 02/01/27 to 05/12/27.

ART-132C: Advanced Life Drawing
This course is a continuation of Art 132B. In this class students will develop an original body of life drawings in various media and surfaces that reflect their knowledge of advanced life drawing techniques with a focus on preparing their portfolio for upper division courses at the university and college level and display in the gallery environment. Typical subjects covered in this class will include developing a body of original artwork that expresses the students personal style, portfolio development for upper division coursework, gallery preparation, presentation of finished artwork with appropriate matting and framing, and writing a formal artist statement. Drawings are based on a live nude model.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: ART 132B.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

Note: 14 week class from 02/01/27 to 05/12/27.

ART-144: Typography and Visual Communication
This course is an introduction to the study of letter forms and fundamental typographic principles and vocabulary with an emphasis on the application to visual communication artifacts. Students investigate typographical structure, format, legibility, and meaning-making through traditional and digital projects, and explore the evolution and classification of letter forms from an historical perspective, including the importance of emerging technology in their development.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ART 148.

ART-148: Fundamental Graphic Design Principles and Digital Practices
This course is an introduction to the fundamental concepts, principles, practices, and theories applied to the creation of compositional space. Students will explore the integration of design elements and principles, color theory, composition, typography, visual communication, and visual logic, as they relate to design disciplines and professional practices.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

ART-161: Digital Photography
This introductory course focuses on photography as a creative medium. Emphasis in the course is on aesthetics, composition, content, technical and creative skills required to make effective images using digital cameras and computer software. Students also critically evaluate photographic images according to the principles of photographic theory. Students will supply their own camera.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

ART-175B: Intermediate Sculpture
This course is the study of intermediate level sculpture techniques relating to three dimensional

composition, spatial relationships, and imagery, with a focus on modeling techniques in clay and mixed media construction. A continued focus of attention to creative self-expression within both a historical and contemporary context is emphasized.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: ART 175A.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

ART-212C: Intermediate/Advanced Ceramics
This course focuses on the science of ceramic art. Students will study, classify, and understand information/data related to the history and chemistry of clay and glazes. They will learn classic methods of compounding glazes by mathematical and chemical calculation; deducing facts and basic principles essential to glaze analysis of constituent materials. Under supervision students will experiment, assess and gain knowledge that applies to the maintenance, operation, and controlled results of firing kilns.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: ART 212B.

ART-260: Museum and Gallery Practices
This course will discuss the history of museums and their present and future. Students will acquire a comprehensive foundation in exhibition design, collections management, public programming, and administration. They will enter contemporary debates surrounding the responsibility of the 21st-century museum alongside the exploration of standards and best practices. This introductory class will give students a general understanding of what goes into making and running a museum and the roles they can play in society. Students can anticipate understanding what the museum is, the role of external forces and stakeholders, and insight into the factors of running a museum or gallery today.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

ART-270B: Intermediate Design in Glass
This course is a study of intermediate glass-working techniques. Topics include designing and producing increasingly complex projects, techniques in fused glass, kiln controls, forming lost wax molds, and increasing complex soldering and lampworking.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: ART 270A.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

Note: This is a HYBRID class. This means that there are both on-campus and online Internet activities required. To participate in this class you must attend all scheduled on-campus classes and have access to a computer that has a reliable internet connection. Students should access http://online.valleycollege.edu during the week prior to the semester start date. All information regarding this class, including course-specific technology requirements, will be found on that webpage. The course may not be accessible to students until the first day of the class.

ART-270C: Intermediate/Advanced Design in Glass
This course is a study of intermediate/advanced glass-working techniques. Topics include designing and producing increasingly complex projects, using different compatible materials, experimental techniques, monitoring live slumping of glass and cold-working glass.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: ART 270B.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

Automotive Technology

AUTO-010: Introduction to Hybrid and Electric Vehicle Technology
This course explores the use of hybrid and electric battery power for vehicle transportation. Topics will include safety when using high voltage, maintenance, drivability, inverter, AC/DC power transfer and battery technology, physics of battery storage and hybrid generation systems. Electric vehicle applications and their integrated systems from many manufacturers will be discussed.
Credit Type: Earned units for this course are applicable to an Associate Degree.

Note: 8 week class from 03/22/27 to 05/13/27.
Note: This is a HYBRID class. This means that there are both on-campus and online Internet activities required. To participate in this class you must attend all scheduled on-campus classes and have access to a computer that has a reliable internet connection. Students should access http://online.valleycollege.edu during the week prior to the semester start date. All information regarding this class, including course-specific technology requirements, will be found on that webpage. The course may not be accessible to students until the first day of the class.

AUTO-050: Automotive Brakes
This course is designed for students and current technicians to gain knowledge and skills in automotive brake systems. This course covers the safety procedures, ethics, and diversity in the automotive industry while focusing on inspection, diagnosis, and servicing of the brake system. This course may be used in preparation for the Automotive Service Excellence (ASE) National Test A-5.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Corequisite: AUTO 050L.
Alternate Listing: This course is also offered as AUTO-650.

AUTO-062: Engine Performance
This course provides an in-depth study of the design and operation of domestic and import ignition and fuel systems, emissions systems, as well as Hybrid and electric vehicle safety procedures. Major areas of study include electronic, and computer control ignition and fuel injection systems. Emphasis is placed on the correct diagnosis of and repair procedures for these systems. This course covers the diagnosis and repair/replacement of major components: all sensors, injectors, fuel pumps, and interpretation of computer related malfunctions. The use of current diagnostic test equipment used in today's industry and strategies necessary to determine needed repairs are covered.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Corequisite: AUTO 062L.

AUTO-065: Advanced Automotive Electrical Systems
This course provides students with the knowledge necessary to diagnose and repair automotive electrical malfunctions. Topics include theory of operations and service of automotive electrical systems. Emphasis on reading wiring diagrams and use of test equipment to diagnose and troubleshoot electrical/electronic systems, such as start-stop and ADAS systems. This course prepares students for the ASE A6 certification exam.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Prerequisite: AUTO 064.

All information regarding this class, including course-specific technology requirements, will be found on that webpage. The course may not be accessible to students until the first day of the class.

BIOL-205: Cell and Molecular Biology
This course is an introduction to cellular and molecular aspects of biology emphasizing principles of scientific process, evolution by natural selection, prokaryotic and eukaryotic cell structure and function, classic and modern genetics, and concepts that integrate cellular with organismal activities. Experimental design concepts and application are emphasized in the laboratory. This is the first semester of three introductory biology courses for the pre-professional, biology major, environmental science or others interested in an in-depth study of biology.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: Eligibility for college level Mathematics based on the SBVC Guided-Self Placement process.

BIOL-206: Organismal Biology
This course is an introduction to the diversity of organisms, their structure, function, and adaptations to the environment. The course requires participation in field trips and outdoor classroom (Living Lab Garden and Oak Garden) activities. This course is part of three introductory biology courses for the pre-professional, biology major, environmental science or others interested in an in-depth study of biology.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: BIOL 205 and eligibility for college level Mathematics based on the SBVC Guided-Self

Placement process.

BIOL-207: Evolutionary Ecology
This course is an introduction to the principles of evolution and the ecological processes governing organisms and populations. The course requires participation in and completion of a field project and participation in weekend field trips and outdoor classroom (Living Lab Garden and Oak Garden) activities. This course is part of three introductory biology courses for the pre-professional, biology major, environmental science or others interested in an in-depth study of biology.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

BIOL-222: Independent Study in Biology
Students with previous course work in biology may do assigned projects involving research and analysis of selected topics. This independent study is for students who are interested in furthering their knowledge of Biology. Prior to registration, a contract must be prepared. See instructor for details.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Repeatability: This course may be taken for a maximum of 3 units.

BIOL-250: Human Anatomy and Physiology I
This is the first semester of a two-semester sequence that introduces students to the basic concepts and principles of human anatomy and physiology. This course provides a foundation for pre-allied professional majors or others interested in the advanced study of human biology. Topics include inorganic and organic chemistry, body orientation and organization, cytology, histology, fluid and electrolyte balances, and the following systems: nervous, skeletal, muscular, nervous, digestive system, and metabolism. Course includes dissections of preserved specimens.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: BIOL C1000 and ENGL C1000 or ENGL C1000H.

BIOL-260: Human Anatomy
This is a comprehensive lecture/laboratory course in human anatomy. It is organized to explore the body both regionally and systemically. The course studies gross anatomy with an extensive dissection of the cat and other significant organs. Relevant comparisons to human systems and structures are emphasized in the laboratory portion of the course. Histological and cellular anatomy are included as they apply to various structures and systems.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: BIOL 155.

BIOL-261: Human Physiology
This course is the second semester of a two-semester sequence. It builds on an understanding of structure to explain the dynamic functions of the human body to a cellular level. Topics include physiology of the following systems: muscular, skeletal, nervous, endocrine, cardiovascular, respiratory, digestive, urinary, and reproductive. Homeostatic mechanisms and the interrelationships of body organ systems are emphasized and enhanced with clinical illustrations.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisites: BIOL 260 and CHEM 105 or CHEM 101.
Departmental Recommendation: BIOL C1000.

BIOL-270: Microbiology
This course is a formal introduction to and exciting exploration of the fundamental principles and techniques of microbiology and immunology. Attention is given to the morphology, control, metabolism, and genetics of microorganisms. Emphasis is placed on the pathogenesis of and immunity to infectious diseases.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: CHEM 101 or CHEM 105.
Departmental Recommendation: Eligibility for college level English based on the SBVC Guided-Self Placement process.

BIOL-C1000: Introduction to Biology with Lab
This combined lecture and laboratory course provides the non-biology major with an introduction to living things and their environment. Students use experimentation and investigation to develop important critical thinking skills. Students learn about the process of science, the building blocks of life, the role and regulation of DNA, how populations change over time, the movement of energy within and between life forms, and how species interact with each other and their surroundings. By the end of the course, students will be able to apply an understanding of biological concepts to current issues and their impacts on society. (Formerly BIOL 100)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Formerly: BIOL-100.

Note: The DE-LEC part of this class requires 6.75 hours per week of online instruction.
Note: 8 week class from 03/22/27 to 05/13/27.
Note: This is a fully online 8-week class. Students will be required to complete online instructional content via Canvas. This class could offer some live online meetings, but students will have options on accessing that content. Students should log on to Canvas the first day of class to access classes.

BUSAD-112: Principles of Retailing
This course will cover the role of retailing in serving and connecting the needs of diverse communities. The topics will include analysis of consumer needs, store locations, financial requirements, and legal processes of starting a retail operation, planning for store layout,

merchandise mix, vendor negotiation, pricing, displaying, advertising, selling, and controlling of merchandise.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

Chemistry

CHEM-101: Introductory Chemistry
Introductory chemistry involves the study of the material makeup of our world and its relationship to life, the natural environment, and our lived experiences. General scientific principles including scientific observation and measurement are also introduced. This course is designed to prepare students for careers in nursing, medicine, engineering and other science and allied health professions.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

CHEM-150: General Chemistry I
General Chemistry I is first-semester college-level chemistry with an emphasis on the mole concept, thermochemistry, atomic and molecular structure, the relationships of intramolecular and intermolecular forces to chemical and physical properties, the periodic table, organic chemistry, and solids, liquids and gases.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

Prerequisites: CHEM 101 or CHEM 105.
Prerequisite/Corequisite: MATH 102 or placement into MATH 102 based on the SBVC Guided-Self Placement process.

CHEM-151: General Chemistry II

General Chemistry II is the second half of a two-part sequence in chemistry with an emphasis on thermodynamics, chemical equilibrium, chemical kinetics, nuclear and electrochemistry. This course prepares students for future courses and careers in chemistry, physics, biology, health sciences, and the earth sciences.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: CHEM 150 and MATH 102 or MATH 151 or placement into MATH 250 based on the SBVC Guided-Self Placement process.

CHEM-212: Organic Chemistry I

This course examines the properties, synthesis, and reactions of organic compounds, those that contain carbon, which includes many important modern materials, such as plastic and pharmaceuticals. It also provides the foundational background to later learn about the chemistry of biological systems.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite/Corequisite: CHEM 151.

CHEM-213: Organic Chemistry II

The second semester of organic chemistry continues the study of carbon compounds including aliphatic, aromatic and heterocyclic series, theoretical concepts, instrumentation, mechanisms, synthesis and functional groups. Laboratory includes preparation and study of properties, and extensive identification of organic compounds.

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.

Prerequisite: CHEM 212.

Child Development

CDEV-075: Family Child Care Practices
This course is designed to meet the specific needs of the family child care provider. The emphasis is on learning licensing regulations, good business practices, age appropriate curriculum, healthy environments, positive guidance, and basic child development. Other topics include creating partnerships with parents, maintaining health and safety and working with children from diverse backgrounds, including children with special needs and disabilities. (Formerly CD 075)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Departmental Recommendation: READ 100.
Formerly: CD-075.

All information regarding this class, including course-specific technology requirements, will be found on that webpage. The course may not be accessible to students until the first day of the class.

CDEV-108: Early Childhood Development
This course covers the development of children from two years to eight years old. Specifically, this course explores prominent theories related to early childhood development, typical and atypical development of children from two to eight years, contextual influences, and methods of studying the

development of young children. (Formerly CD 108)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H or READ 100.
Formerly: CD-108.

3680	70	3.00	Arranged	Online - Online	DE-LEC	ONCL	ONLN	Sanders,D

Note: The DE-LEC part of this class requires 3.37 hours per week of online instruction.
Note: This is a fully online class. Students will be required to complete online instructional content via Canvas. This class could offer some live online meetings, but students will have options on accessing that content. Students should log on to Canvas the first day of class to access classes.

CDEV-109: Childhood Stress and Trauma
This course provides a comprehensive overview of theories, concepts and issues related to childhood stress and trauma. Emphasis is on the short-term and long-term effects that stress and trauma have on the physical, cognitive, language, social and emotional stages of a child's development. Students are introduced to child behavior patterns and potential responses to stress and trauma. Students examine research and innovative methods that support a child's coping skills and healing process. This course is designed to help early childhood practitioners and parents understand how children react and adapt to stress and trauma and to learn strategies to support and care for children. (Formerly CD 109)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H or READ 100.
Formerly: CD-109.

Note: This is a synchronous course. Students registered in this course will be required to log in and be present for the days and times listed. You will be live online with the instructor for all class meetings.

CDEV-111: Observation and Assessment in Child Development
This course covers the appropriate use of a variety of assessment and observation strategies to document young children's development and learning. The use of findings to inform and plan learning environments and experiences are emphasized. Recording strategies, rating systems, portfolios, and multiple assessment tools are discussed, along with respectful strategies for collaboration with diverse families and professionals. This course requires a minimum of 15 hours

observing children. (Formerly CD 111)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite/Corequisite: CDEV C1000 or CDEV C1000H.

CDEV-113: Principles and Practices of Teaching Young Children
This course examines the historical and theoretical perspectives of developmentally appropriate practices in early care and education for children from birth through age eight. Typical roles and expectations of early childhood educators are explored. Professional ethics, career pathways and professional standards are identified. Students learn best practices for developmentally and culturally appropriate learning environments, curriculum, and effective pedagogy for young children, including how play contributes to children's learning, growth and development. (Formerly CD 113)
Credit Type: Earned units for this course are applicable to an Associate Degree.

Note: This is a fully online class. Students will be required to complete online instructional content via Canvas. This class could offer some live online meetings, but students will have options on accessing that content. Students should log on to Canvas the first day of class to access classes.

CDEV-186: Infant and Toddler Curriculum
This course is a survey of program and curriculum planning for infants and toddlers child care and education settings, including early intervention and inclusive programs, emphasizing curriculum and principles and practices of quality care and developmentally appropriate practices specific to infants, toddlers and two-year-old children, birth to three years. (Formerly CD 186)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: ENGL C1000 or ENGL C1000H or READ 100.
Formerly: CD-186.

Note: 14 week class from 02/03/27 to 05/13/27.
Note: This is a synchronous course. Students registered in this course will be required to log in and be present for the days and times listed. You will be live online with the instructor for all class meetings.

CDEV-205: Child Development Practicum / Field Experience
Students learn teaching skills through the demonstration of developmentally appropriate early childhood program planning and teaching competencies under the supervision of ECE/CD faculty and other qualified early education professionals. Students utilize practical classroom experiences to make connections between theory and practice, develop professional behaviors, and build a comprehensive understanding of children and families. Reflective practice will be emphasized as student teachers design, implement, and evaluate approaches, strategies, and techniques that promote development and learning. This course also includes exploration of career pathways, professional development, and teacher responsibilities. (Formerly CD 205)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite: CDEV C1000 or CDEV C1000H and CDEV 113 and CDEV 114 and CDEV 126.
Departmental Recommendation: ENGL C1000 or ENGL C1000H or READ 100.
Formerly: CD-205.

COMM-140: Small Group Communication
This course provides students with the foundational knowledge and practice of speechmaking in a democratic society, while simultaneously emphasizing theory and research about communication in a variety of small group contexts. Additionally, the instruction and assessment centers on the efficacy of communication processes such as problem solving, conflict management, decision making, roles in groups, group development and leadership. This course is intended for students pursuing a Communication Studies degree or any discipline requiring effective communication in group settings. Throughout the course, students are expected to speak their own words, not words written by others. This course includes faculty-supervision and faculty evaluated oral presentations in the presence of others. (Formerly COMMST 140)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: Eligibility for college level English based on the SBVC Guided-Self Placement process.
Alternate Listing: This course is also offered as COMM-140H.

COMM-174: Intercultural Communication
This course focuses on the communication behaviors and values common to all cultures and ethnic groups and on the differences that insulate and divide people. Students will examine influences on the communication process, including aspects such as stereotyping, perception, prejudice, values and expectations. Students will learn to overcome the communication problems that can result when members of other cultures communicate by evaluating their own intercultural communication patterns and learning skills to increase their effectiveness. Students will also acquire a greater appreciation for others. (Formerly COMMST 174)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: Eligibility for college level English based on the SBVC Guided-Self Placement process.

Note: The DE-LEC part of this class requires 4.5 hours per week of online instruction.
Note: 12 week class from 02/15/27 to 05/13/27.
Note: This is a fully online class. Students will be required to complete online instructional content via Canvas. This class could offer some live online meetings, but students will have options on accessing that content. Students should log on to Canvas the first day of class to access classes.

COMM-C1000: Introduction to Public Speaking
In this course, students learn and apply foundational rhetorical theories and techniques of public speaking in a multicultural democratic society. Students discover, develop, and critically analyze ideas in public discourse through research, reasoning, organization, composition, delivery to a live audience and evaluation of various types of speeches, including informative and persuasive

speeches. (Formerly COMMST 100)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Alternate Listing: This course is also offered as COMM-C1000H.

Computer Information Technolog

CIT-010: Fundamentals of Documents Management
This course introduces the fundamentals of keyboarding, emphasizing touch typing on a standard keyboard. Students will learn to format various personal and business documents, including letters, reports, emails, and tables. The course aims to improve both speed and accuracy through a series of text and numeric drills, helping students achieve a typing speed of 30 words per minute over five minutes. Additionally, it aims to enhance students' data entry skills for increased efficiency on the job.
Credit Type: Earned units for this course are applicable to an Associate Degree.

CIT-091: Introduction to Networks (CCNA - Cisco Networking Academy)
This first course in a three-course CCNA series introduces architectures, models, protocols, and networking elements - functions needed to support the operations and priorities of Fortune 500 companies to small innovative retailers. Students will have the chance to build simple local area networks (LANs). Developing a working knowledge of IP addressing schemes, foundational network security, students will be able to perform basic configurations for routers and switches. After completing all three CCNA courses, students are ready to take the CCNA Certification.
Credit Type: Earned units for this course are applicable to an Associate Degree.

CIT-114: Spreadsheets: Excel
In this course, students will learn how to create workbooks using Microsoft Excel, which integrates spreadsheet analysis, information management, and graphics. Content includes the design and use of worksheets, data entry, formulas, functions, and graph creation. Students will also learn how to professionally format worksheets, use Excel functions in different applications, use Excel financial functions and data tables, and understand the concept of data management in Excel.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: CIT 100 or CIT 101.

CIT-116: Database Management: Access
This is a comprehensive course in the development and maintenance of a database. It provides a working knowledge of designing a database that includes: setting field properties, storing, retrieving, printing, and indexing records, creating informational and technical queries, developing customized forms and reports, establishing different types of relationships, and integrating Access with the Web. The course emphasis is on developing a practical ability to use a database in a Windows environment with full graphical user interface functionality.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: CIT 100 or CIT 101.

CIT-140: Introduction to Systems Analysis and Design
The course presents a systematic methodology for analyzing a business problem or opportunity, determining what role, if any, computer-based technologies can play in addressing the business

need, articulating business requirements for the technology solution, specifying alternative approaches to acquiring the technology capabilities needed to address the business requirements, and specifying the requirements for the information systems solution in particular, in-house development, development from third-party providers, or purchased commercial-off-the-shelf packages.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: CIT 101.

CIT-611: Introduction to AI Tools
This course provides an introduction to foundational Artificial Intelligence (AI) tools and practical techniques for using them effectively. Students will explore various AI platforms, including Generative AI, Axio AI, Perplexity AI, Gemini AI, and ChatGPT, among others. By the end of the course, students will be able to evaluate and select the most suitable AI tool for a range of real-world scenarios.
Credit Type: Noncredit course.
Grading Restriction: Graded on a Credit/No Credit basis only.

Computer Science

CS-074: iOS App Development
This course will cover the fundamentals of iPhone application development using the Objective-C, Swift, and the iPhone SDK (Software Development Kit). The theory and use of using and managing Xcode, 3D Game Development, Storyboard Builder, Audio /Animation /Data /Location, User Interface (UI) development, game and app design will be covered. Students will gain valuable experience using front end and back end development tools to complete production ready iPhone applications.
Credit Type: Earned units for this course are applicable to an Associate Degree.

CS-075: Introduction to Web Development
This course focuses on web development and addresses the essentials for skilled web developers who can create digital media, web, and mobile applications for modern desktop and portable devices. Students in this program are offered an in-depth, project-driven curriculum that provides a comprehensive study of HTML, CSS, JavaScript, Web Animation, Multimedia Creation. Students will learn to develop visually aesthetic, user friendly, and interactive web-based applications. Students will also gain valuable experience using front end and backend development tools like Adobe Dreamweaver, Adobe Animate, and Visual Studio. Students will also be exposed to the programming languages that cross over from web development to mobile device development. The synergy between the many web and mobile technologies will help each student build a foundation suitable for professional content.
Credit Type: Earned units for this course are applicable to an Associate Degree.

CS-077: Introduction to C-Sharp
This course is an introduction to C# (C Sharp) app development. C# is a sophisticated and type-safe object-oriented language that empowers developers to build a variety of secure and robust applications that run on the .NET Framework. Topics will include fundamental object-oriented programming concepts like loops, arrays, logic, debugging, database, using the C# languages in a game development environment, files, and game development.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Departmental Recommendation: Eligibility for college level Mathematics based on the SBVC Guided-Self Placement process.

CS-102: Introduction to Python Programming
This course will cover the most common Python libraries as well as teach you programming best practices. We will explore different aspects of Python, including web, utility applications, machine learning, computer vision, IoT (Internet of Things), and data modeling applications. By the completion of the course, learners will complete a project using Python related to their major or area of interest.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: MATH 102 or MATH 115 or STAT C1000 or STAT C1000H.
Alternate Listing: This course is also offered as CS-102H.

CS-104: Data Programming with Python
This course takes students further in Python knowledge and also explores the Python packages and libraries for different applications such as machine learning, data science, and artificial intelligence. It also utilizes the popular packages such as Numpy, Pandas, MatPlotLib, SKLearn, and Pytorch. It takes the students through the usage of popular coding notebook with the IPython kernel such as Jupyter, and the popular cloud GPU services. By the completion of this course, students will have

experience using notebook for coding using the aforementioned packages and services to further into area of interest related to programming, especially in the area of data science, machine learning, and artificial intelligence.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: CS 102.

CS-150: Web Programming with PHP
This course uses PHP (PHP: Hypertext Preprocessor) for programming introduction; as well as web server-side programming for web apps of dynamic websites and web services. It also introduces database-driven web infrastructure, using PHP to access database server and content management system for a full-fledged web app. Topics include PHP fundamentals, function, array, string, object-oriented paradigm, data store (database management system) introduction, content management system (CMS) introduction, PHP with data store, PHP with CMS, LAMP/WAMP stack introduction.

Although not required, but some coding knowledge and experience in high-level programming language (such as C++) is strongly advised.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.

CS-170: Assembly Language
This course focuses on the organization and behavior of computer systems at the assembly-language level. The mapping of high-level language statements and constructs to machine-level instructions and internal representation of common data types and simple structures is studied including the methods of numerical computation with assembly language constructs emphasizing common pitfalls associated with data representation and procedural errors encountered during the creation of machine language routines. This course includes hands on experience creating assembly language programs.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: CS 110.

DANCE-101A: Beginning Modern Dance
This course focuses on the "inner impulse" of modern dance and draws upon the movement vocabularies of classical, post-modern, and contemporary styles. A strong emphasis is placed on the acquisition of beginning modern dance movement vocabulary, dynamic alignment, and suppleness, flexibility, rhythmically, musicality, endurance and balance.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.
4036	01	2.00	-M-W---	08:00A - 11:10A	LAB	GYM	214	Townsend,M

DANCE-101B: Beginning/Intermediate Modern Dance
This beginning/intermediate level of Modern Dance utilizes the basic knowledge of beginning modern dance techniques to increase the movement vocabularies of classical, post-modern, and contemporary styles. Students will utilize a higher level of codified modern dance terminology and combinations, which are essential to move forward in modern dance.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: DANCE 101A.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.
4038	01	2.00	-M-W---	08:00A - 11:10A	LAB	GYM	214	Townsend,M

DANCE-102A: Intermediate Modern Dance
This course offers an intermediate study of modern dance techniques. It will include movement vocabularies of Graham, Horton, Cunningham, Limon and the post modern and contemporary styles of today. Emphasis is on expanding and deepening the dancer's technical and expressive skills through more complicated techniques, combinations and improvisations. Concert and performance is required.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

ECON-C2001H: Principles of Microeconomics - Honors
An introductory course using microeconomic models to understand individual decisions by consumers and firms, market outcomes including market failure, elasticity, market structures, labor markets, inequality, and the impact of government policies. This is an honors course. (Formerly ECON 201H)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: Placement as determined by the college's multiple measures assessment process or completion of a course taught at or above the level of elementary algebra.
Alternate Listing: This course is also offered as ECON-C2001.

EDUC-102: Introduction to Education Policy
This course provides an overview of how federal and state education policy and practice, assessment theories, teaching practices and methodologies can exert a positive impact on teaching and learning outcomes frameworks governing public education. It explores the political dynamics of policy-making with an emphasis on centralized policy-making authority and on efforts to reform and

improve public schools. It also explores competing values guiding policy debates and dilemmas of centralized policy control.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: READ 100.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.

EDUC-103: Education, Society, and Culture
This course introduces the history and philosophy of public education in the United States, how and why certain school-society issues first arose in this country, and how those issues have changed over time with an emphasis on critical social justice-oriented theories and principles that actively address the dynamics of oppression and privilege within the context of education, society, and culture. This course examines society as the product of historically rooted, institutionally sanctioned stratification along socially constructed group lines, including race, class, gender, sexual orientation, and ability. It also includes a survey of the political economy, dominant ideologies, and existing educational practices that have precedents in various historical eras with an examination of the history of education of girls and women, People of Color, minority groups and people of varying socioeconomic classes.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: READ 100.

EDUC-200: Introduction to Elementary Education
This course introduces students to the concepts and issues related to teaching diverse learners in contemporary public schools (K-12). Topics include historical and philosophical foundations of the American education system, education theory, multiculturalism, teaching as a profession and career, contemporary education issues, California Content Standards and framework, and teacher performance standards. In addition to class time, 45-hours of structured fieldwork are required at an approved public school elementary classroom with a certified classroom teacher and students that represent California's diverse population. Proof of a negative TB test and fingerprint clearance are required for classroom observations.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

Electricity

ELEC-091: Fundamentals of Solar Energy
This course is designed for students interested in a career in the solar industry. The fundamental principles and functions of the photovoltaic industry will be introduced along with the planning, installation and maintenance of all necessary components for a photovoltaic system. The transmission and distribution of electric power will be reviewed, and basic concepts of electricity,

identification, functions and operations of components will be surveyed. At the end of this course, students will be prepared to complete industry certification examinations.
Credit Type: Earned units for this course are applicable to an Associate Degree.

ELECTR-116: Alternating Current Circuit Laboratory
This course is the laboratory complement to ELECTR 115 including skill training in reading and interpreting measurements on an oscilloscope, using QT boards, function generators, and other test equipment.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisites: ELECTR 110 and ELECTR 111.
Corequisite: ELECTR 115.

ELECTR-155: Electronic Drawing and Assembly
This course covers electronic schematic capture, simulation, export to printed circuit board design, layout, and auto-routing software. It includes basic Computer Aided Design (CAD) drafting, block diagrams, library component templates, and printed circuit board (PCB) design, fabrication, and assembly, using with through-hole and surface-mount technology and devices (SMT and SMD).
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite: ELECTR 110.

ELECTR-266: Microprocessor Technology with Assembly Language
This course covers the fundamental principles of microprocessors and microcontrollers. The architecture of the Atmel AT328 series microcontroller is highlighted along with its' operation and applications in embedded systems. Students make use of assembly language and C language to interface with both analog and digital circuitry. Software simulation tools and microcontroller trainer boards are used in lab exercises and a final project.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite: ELECTR 265.

ELECTR-270: Linear Integrated Circuit Analysis

This course is a review of bipolar transistor fundamentals and differential amplifiers with emphasis on inner connections and circuit designs using integrated circuit operational amplifiers (OP AMPS), phase-lock loops, and current differentiating amplifiers. Oscilators, wave generators, Scaler, integrator, differentiator, voltage summing, differential amplifier, and active filter circuits with various responses utilizing Operational Amplifiers are covered, including breadboarding and evaluation of various types of active linear and pulse circuits involving operational amplifiers and phase-lock loops.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisites: ELECTR 115 and ELECTR 116.

Engineering

ENGR-100: Engineering Career Exploration
This course introduces students to the major fields of specialization within engineering and engineering technology professions. This course gives students a broad understanding of various career opportunities and the specialized demands and rewards of each field.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

ENGL-122: Journalism Production: Introduction
This course provides an introduction to gathering, synthesizing/organizing and writing news in journalistic style across multiple platforms resulting in the production of the campus student news magazine. Topics include the role of the journalist and related legal, ethical issues, social and cultural issues. Students will report and write based on their original interviews and research to produce news content. Experiences may include covering speeches, meetings and other campus events, writing under deadline, and use of AP Style.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite: ENGL C1000 or ENGL C1000H.

ENGL-300: Advanced Writing and Critical Thinking in the Industry Disciplines
This upper division course builds on the critical thinking and writing skills developed at the lower division level to equip future professionals and leaders in industry sectors with essential skills in written communication and critical thinking. This course further prepares students in the application of logical reasoning, analysis, and strategies of argumentation in both written and oral communication of content specific information; emphasizing clarity and audience awareness, students will master various document types, including technical reports, feasibility studies, and public communications. Through critical analysis of industry related scholarly and professional readings, as well as complex writing assignments, students will develop writing as a core aspect of leadership and academic and professional practice.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Limitation on Enrollment: Enrollment in this course is limited to the students in specific bachelor's program(s) offered at SBVC.
Prerequisite: Admission to a SBVC baccalaureate program and ENGL C1000 or ENGL C1000H.

ENGL-C1001H: Critical Thinking and Writing - Honors
In this course, students receive instruction in critical thinking for purposes of constructing, evaluating, and composing arguments in a variety of rhetorical forms, using primarily non-fiction texts, refining writing skills and research strategies developed in ENGL C1000 College Reading and Writing (C-ID ENGL 100) or similar first-year college writing course. This is an honors course. (Formerly ENGL 102H)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: College-level composition (ENGL C1000/C-ID ENGL 100) or equivalent.
Alternate Listing: This course is also offered as ENGL-C1001.

ENGL-C1002: Introduction to Literature
In this course, students are introduced to works by diverse authors and major literary genres, developing close reading and analytical writing skills. Students also develop appreciation for and critical understanding of the cultural, historical, and aesthetic qualities of literature. (Formerly ENGL 151)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: Successful completion of college-level composition (ENGL C1000/ENGL C1000H/ENGL C1000E/C-ID ENGL 100) or equivalent.
Alternate Listing: This course is also offered as ENGL-C1002H.

English As a Second Language

ESL-601: ESL Integrated Skills - Introduction to Basic English Literacy
This noncredit course is designed to introduce low-beginning English language learners to basic English letter-sound correspondence, vocabulary, and sentence patterns. Students will start using English to speak about themselves, their families, and their community. In addition, students will learn to read and complete simple forms. This course is taught through total English immersion while acknowledging students' cultural experiences.
Credit Type: Noncredit course.
Grading Restriction: Graded on a Credit/No Credit basis only.

ETHS-104: Latina/o/x Studies

This course offers an overview of the experiences and contributions of Latina/o/x communities in the United States. Students will examine the impact of colonization, immigration, and forced displacement on these communities, as well as the formation of cultural identity and resistance movements. Throughout the course, students will analyze the intersections of race, ethnicity, class, gender, sexuality, and other forms of oppression that shape the experiences of Latino/a and Chicano/a communities. They will critically examine issues such as education, labor, health, immigration, and representation in media and politics.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

ETHS-106: Introduction to Black Studies
This course provides an overview of the interdisciplinary field of Black Studies, examining the experiences, cultures, histories, and contributions of people of African descent in the United States and worldwide. The course will explore key concepts, themes, and debates in Black Studies, including race, racism, colonialism, diaspora, identity, power, resistance, and social justice. Topics covered include the transatlantic slave trade, colonialism and decolonization, Pan-Africanism, Black Nationalism, Civil Rights and Black Power movements, African American literature and art, Hip Hop culture, and contemporary issues affecting people of African descent. Throughout the course, students will engage in critical thinking and analysis of issues such as identity formation, community building, activism, and social justice.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

On the first day of class students must log into Canvas to access this course and receive initial information from the instructor.

FTVM-103: Ethnicity and Identity in Media
This course explores the impact of identity on film as an art form and cultural artifact by confronting ideologies of race, class, gender, and sexual orientation as they are reflected in cinematic representation. American film is used as the primary lens through which to view how social, political, and cultural values have been formulated over the last century. Students analyze major

films, figures, character types, and narrative strategies to evaluate the relationship between film and identity. (This course is also offered as ETHS 103)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.
Alternate Listing: This course is also offered as ETHS-103.

FTVM-104: Women in Cinema
This course offers a comprehensive exploration of the portrayal, influence, and representation of women in the realm of cinema. Through screenings, critical readings, and discussions, students will analyze the evolving roles of women both on and off the screen, spanning historical and contemporary contexts. From pioneering female filmmakers to iconic characters and shifting societal norms, students will examine how cinema reflects and shapes perceptions of gender, identity, and power dynamics. Through the lens of feminist film theory, students will critically engage with diverse cinematic works, exploring themes of agency, representation, and intersectionality. By the course's conclusion, students will gain a deeper understanding of the multifaceted contributions of women to the art of filmmaking and a heightened awareness of the ongoing challenges and opportunities for gender equity within the industry.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

Note: The DE-LEC part of this class requires 3.6 hours per week of online instruction.

Note: The DE-LAB part of this class requires 5.4 hours per week of online instruction.
Note: 10 week class from 03/01/27 to 05/13/27.
Note: This is a fully online class. Students will be required to complete online instructional content via Canvas. This class could offer some live online meetings, but students will have options on accessing that content. Students should log on to Canvas the first day of class to access classes.

FTVM-114: Editing I
This course focuses on the fundamental techniques, skills, and theories of editing as well as the technical requirements for assembling a digital video project. Through a series of hands-on projects, students will put traditional theories of picture and sound editing into practice. The course will also cover the history of nonlinear editing and provide an overview of the post-production process.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

Note: This is a HYBRID class. This means that there are both on-campus and online Internet activities required. To participate in this class you must attend all scheduled on-campus classes and have access to a computer that has a reliable internet connection. Students should access http://online.valleycollege.edu during the week prior to the semester start date. All information regarding this class, including course-specific technology requirements, will be found on that webpage. The course may not be accessible to students until the first day of the class.

FTVM-121: Writing for Cinema
In this screenwriting course students will learn the Hollywood standard when it comes to screen writing and story development. This includes 3 act structure, episodic, and the hero's journey. All of which are time tested paradigms, which drive the Hollywood film, broadcast, and streaming industries. Students leave this course with a strong portfolio of work in which they can shop around for representation or produce themselves.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: ENGL C1000 or ENGL C1000H and FTVM 120.

FTVM-122: Acting and Directing for Television and Film
In this course, students learn the foundations of both acting and directing for the screen. This course deals with the foundations of character development from an actor's perspective and how to achieve that performance on screen. Students also learn the basics of managing a set as a director and

learning how to communicate goals with actors, blocking for a scene, and producing a scene.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

FTVM-130: TV Production I
This course is designed for students who are interested in transforming a narrative concept into a practical production. By viewing, discussing, planning, and developing stories. Film, television, and media students will learn skills necessary to produce a film or video in a TV Studio and location environment. Topics include studio signal flow, directing, theory and operation of camera and audio equipment, switcher operation, fundamentals of lighting, graphics, video control and video recording and real-time video production.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

FTVM-132: Film and Video Production I
Have you ever wondered how music videos and commercials are created? These productions use techniques of single camera operations. This course introduces the theories, terminologies, and operations of video production. The topics include composition, single-camera operation, portable field lighting, video recorder, audio recording and control, and editing. The aesthetic theories and

fundamentals of scripting, producing, and directing for broadcast commercial or video to be used in other multimedia platforms. Students will plan and execute pre-production, production, and post-production working as a cohesive production crew.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H and FTVM 130.

FTVM-133: Broadcast News
The Broadcast News course prepares students to work in the evolving media environment by introducing them to the theories, techniques, and skills used in standard and online newsrooms for news-related distribution, which includes both streaming and broadcast. The goal of the course is for students to develop the fundamental skills necessary to create journalistic content and distribute the content across integrated platforms in the format of a newscast or news report. The course provides students with learning the craft of multi-media news production and allows students to have student news stories to be broadcast on KVCR TV and streaming pathways through PBS.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

All information regarding this class, including course-specific technology requirements, will be found on that webpage. The course may not be accessible to students until the first day of the class.

FTVM-134: Sports Broadcasting
This course teaches the fundamentals of Sports Broadcasting. Students will take the lead on writing and preparing broadcasts and building presentation/performance skills in the broadcast of local

sports on for broadcast on both TV and radio on the campus broadcast station KVCR. The sports to be broadcast include local college, high school sports and specialized events known for the region. Students will also perform as sportscasters on news programs on KVCR. Students will interview local athletes, write and produce feature material for broadcast. The contributions of minorities and women in sports will be highlighted.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.

FTVM-162: Film Photography
A foundational course in film photography that explores its resurgence as a trendy and impactful artistic medium and communication tool. Students will be introduced to the craft of shooting with 35mm film cameras, film processing, and darkroom printing. Emphasis is placed on the poetic, conceptual, and social dimensions of the medium, highlighting its renewed appeal in contemporary creative culture. Students will develop artistic concepts for film photography projects across various genres, embracing the timeless yet increasingly popular aesthetic of analog photography. Designed for beginners looking to engage with the medium in both a technical and expressive capacity.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

FTVM-198: Media Practicum
This course includes practical experience in design/layout, visual, online, multimedia journalism,

emerging technologies, and leadership/management. This intermediate student media practicum includes lab hours that regularly produce news, feature non-fiction product, or documentary with a journalism emphasis by and for students and distributed to a campus or community audience. Some assignments may include a variety of student media across multiple platforms, including print, broadcast, and online. Content must be student produced with student leadership emphasis.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite: FTVM 114 and FTVM 130 or FTVM 132 or FTVM 133.

FTVM-213: Radio and Podcast Operations
Radio and Podcast Operations introduces students to the advanced techniques and workflows necessary to create professional-quality audio content across multiple formats. Students will engage in producing short- and long-form projects, including podcasts, promotional spots, features, music segments, and news reports. Emphasis is placed on project development, team collaboration, audio engineering, scriptwriting, and understanding audience demographics. Students will also explore the importance of representation and inclusivity in audio media. By the end of the course, students will be prepared to produce broadcast-ready content suitable for outlets such as KVCR, YouTube, and managed podcast platforms.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.

FTVM-233: TV Studio Production II
This is an in-depth course that encourages collaboration between students, and provides them with powerful feedback from peers, faculty, and industry professionals. Students have access to a unique opportunity to create original programming in the KVCR Studio. Along with exploring advanced television production techniques and management, the course is an intensive session which provides our students with the chance to explore areas such as writing, lighting, set design, performance and show running. It's a great opportunity to add to their portfolio and showcase their talents.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.

FTVM-235: Cinema Production
This course focuses on techniques of cinema and motion picture production using theoretical and critical rubrics, allowing the student to gain proficiency in producing, directing, cinematography, production design, sound recording, grip/electric, and editing as applied in feature films and films made for television and Internet. Students will develop skills and work as a team while learning the roles and responsibilities of various facets of the filmmaking process during pre-production, production and post-production. Working with previously original scripts written by students, students learn skills that include the visualization of the screenplay, script breakdown, preparation of shot lists, direction of actors, and the staging of action for the camera.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite: FTVM 131 and FTVM 122.

FTVM-603: Film Cinematography
In this noncredit course students are introduced to the fundamentals of shooting motion pictures on actual film stock. Developed in collaboration with Kodak Film, this noncredit course covers the mechanical operation of film cameras, understanding various film types, and exploring the distinct aesthetic qualities film provides over digital formats. Students will gain hands-on experience loading, operating, and maintaining film cameras, as well as developing an appreciation for film workflows, aspect ratios, lighting techniques, and the influence of underrepresented groups in the filmmaking industry. Students will also be exposed to film scanning and will have the opportunity to digitize their film.
Credit Type: Noncredit course.
Grading Restriction: Graded on a Credit/No Credit basis only.

Geographic Information Systems

GIS-100: Map Interpretation and Geospatial Analysis
Have you ever wondered how the traffic map works on your phone? Do you enjoy exploring maps and satellite images online? This class is an introduction to maps, images and geospatial techniques and technologies. The technologies covered in this course include map and aerial photograph interpretation, tabular data, spatial statistics, cartography, Global Positioning Systems (GPS), automated and web-based mapping, remote sensing, and Geographic Information Systems (GIS), all of which aid in data collection, analysis and presentation. Theories, methods, and ethics within GIS, GPS, remote sensing, cartography, and field work play a central role in this course. This course also highlights how GIS and geospatial analytical tools can address longstanding issues related to economic, environmental, political, racial, and social justice. (This course is also offered as GEOG 100).
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ECON 208 or STAT C1000 or STAT C1000H or PSYC 105 and ENGL C1000 or ENGL C1000H.
Alternate Listing: This course is also offered as GEOG-100.

			Arranged This session meets on 01/19/27	Online - Online	DE-LAB	ONCL	ONLN	Staff

Note: The DE-LEC part of this class requires 4.5 hours per week of online instruction.
Note: The DE-LAB part of this class requires 6.75 hours per week of online instruction.
Note: 8 week class from 01/19/27 to 03/12/27.
Note: This is a fully online class. Students will be required to complete online instructional content via Canvas. This class could offer some live online meetings, but students will have options on accessing that content. Students should log on to Canvas the first day of class to access classes.

GIS-130: Introduction to Geographic Information Systems (GIS)
How do corporations know where to locate retail stores and restaurants? How do epidemiologists know how to confront epidemics, pandemics, and related disease outbreaks? How does your utility provider know the location of power outages and water leaks? How do demographers create maps based on ethnicity, socioeconomic status, age, gender, religious affiliation, and other population characteristics? The answers to these questions and more are found within Geographic Information Systems (GIS). This course provides an introduction to the fundamentals of Geographic Information Systems (GIS), including the history of automated mapping. It includes a brief introduction to basic cartographic principles, including map scales, coordinate systems and map projections. GIS hardware and software are implemented, as are various applications of GIS technology used in environmental science, business and government. Using automatic mapping software like ArcGIS Online, ArcGIS Pro, ArcMap, and Story Maps, you will create maps that address a variety of local to global issues. (This course is also offered as GEOG 130)
Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ECON 208 or STAT C1000 or STAT C1000H or PSYC 105 and ENGL C1000 or ENGL C1000H.
Alternate Listing: This course is also offered as GEOG-130.

			---W--- This session meets on 02/16/27	06:00P - 09:50P	LAB	PS	217	Staff

Note: 12 week class from 02/16/27 to 05/13/27.
Note: This is a HYBRID class. This means that there are both on-campus and online Internet activities required. To participate in this class you must attend all scheduled on-campus classes and have access to a computer that has a reliable internet connection. Students should access http://online.valleycollege.edu during the week prior to the semester start date. All information regarding this class, including course-specific technology requirements, will be found on that webpage. The course may not be accessible to students until the first day of the class.

GIS-135: Spatial Analysis with GIS
Cloud computing, artificial intelligence (AI), web GIS, and automated mapping are becoming increasingly important within spatial analysis. This course is an introduction to spatial analysis with fundamental concepts and analytical procedures used to simplify complex spatial modeling. Specific methods covered include spatial queries, buffering, overlay, interpolation, network analysis, surface analysis, and spatial autocorrelation. Spatial analysis tools and services have the capacity to highlight and address long-standing issues of economic, environmental, racial, and social justice, as well as environmental sustainability.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite: GEOG 130 or GIS 130.

GIS-137: GIS Advanced Applications
This course provides hands-on training in advanced applications of GIS using ArcGIS Online, ArcGIS Pro, ArcGIS Developer, and ArcGIS Enterprise. It includes Application Programming Interface (API), Visual Basic Applications (VBA), JavaScript, and Python scripting for customizing ArcGIS. It includes an introduction to ArcGIS Server, Web Map Service (WMS), ArcGIS WebApp Builder, and building maps and models for publishing to the web. Students will build web applications with GIS capabilities using Application Service Provider (ASP) and application programming interface (API) tools.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite: GIS 135.

Geography

GEOG-100: Map Interpretation and Geospatial Analysis
Have you ever wondered how the traffic map works on your phone? Do you enjoy exploring maps and satellite images online? This class is an introduction to maps, images and geospatial techniques and technologies. The technologies covered in this course include map and aerial photograph interpretation, tabular data, spatial statistics, cartography, Global Positioning Systems (GPS), automated and web-based mapping, remote sensing, and Geographic Information Systems (GIS), all of which aid in data collection, analysis and presentation. Theories, methods, and ethics within GIS, GPS, remote sensing, cartography, and field work play a central role in this course. This course also highlights how GIS and geospatial analytical tools can address longstanding issues related to economic, environmental, political, racial, and social justice. (This course is also offered as GIS 100).
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ECON 208 or STAT C1000 or STAT C1000H or PSYC 105 and ENGL C1000 or ENGL C1000H.
Alternate Listing: This course is also offered as GIS-100.

GEOG-102: Cultural Geography
Are you fascinated with the enormous diversity of culture, language, religion, economics, politics, urbanization, agriculture, and ethnicity around the world? Have you ever wondered how this developed? Are you concerned about human rights, social justice, climate change, and access to clean drinking water, healthcare, education, and resources? Using the tools of geography, this course will help you to understand how humans interact each other and how humans interact with the environment.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

GEOG-106: Geographic Perspectives on the Environment
Within the early decades of the 21st century, the enormous impact of humans on the natural environment is clear. This course provides an introductory study of the latest geographic perspectives of critical environmental issues occurring within and across local, regional, national, and global scales. It creates an awareness of the geography of human-environment relationships, in

particular how nature and natural resources are defined, contested, distributed, and consumed. Emphasis is on social, political, cultural, psychological, and economic evaluation of natural resources and associated resource management.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

GEOG-110: Physical Geography
You may have noticed that Earth's atmosphere, life forms, water resources, and landforms vary considerably from one place to another. This class helps you to understand how and why these variations occur, how the environment impacts us humans, and how we humans impact the environment. People from different backgrounds experience environmental impacts differently, so environmental justice is interwoven throughout this course. GEOG 111/GEOG 111H is strongly recommended for students who desire to transfer to CSU/UC. It is recommended that students complete GEOG 111/GEOG 111H within three years of completing GEOG 110.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

GEOG-111: Physical Geography Laboratory
In this laboratory companion for the GEOG 110 physical geography lecture course, you will use hands-on, in-class and field-based experiences to better understand and appreciate how and why Earth's atmosphere, life forms, water resources, and landforms vary considerably from one place to another. Because we humans are part of the physical environment, it is important to understand how people from different backgrounds impact the environment and experience environmental impacts differently. This course is recommended for students concurrently enrolled in GEOG 110 or who have successfully completed the course within the last three years. Students should be prepared to participate in one or more off-campus field exercises.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite/Corequisite: GEOG 110.

GEOG-114: Weather and Climate
Do you monitor the daily weather? Are you intrigued by severe weather events like tornadoes, tropical cyclones, blizzards, and flooding rain? This course covers Earth's atmospheric phenomena, with special reference to causes and regional distribution of weather and climate, both past and present. Topics include atmospheric structure and composition, solar radiation and energy balances, temperature, seasonal changes, atmospheric moisture, clouds and fog, precipitation, air pressure, winds, air masses and fronts, cyclones, weather forecasting, climate, and climate change. Emphasis will be given to current environmental topics, including natural and anthropogenic global climate change, air pollution, and environmental justice.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

Geology

GEOL-101: Introduction to Physical Geology
Earth is an amazing place, and for millennia cultures and civilizations have attempted to explain the various topics that relate to our understanding of our blue planet. From the various minerals, rocks, and resources found on it that power our cellphones and televisions to the dramatic features, such as mountains, volcanoes, canyons etc. that shape our landscape. From the consequential natural disasters such as earthquakes that we in California and people around the world deal with on an annual basis to the disproportionate effects of global climate change. In this course we build a fundamental understanding of these topics (and many more) by emphasizing the overarching Theory of Plate Tectonics, the processes that created the continents and the ocean basins, and the internal and external processes that change the landscape and impact the planet in a variety of ways we seek to put ourselves in the context of our planet.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

GEOL-140: Earth Science
An introduction to the essentials of Earth Science including the geosphere, atmosphere, hydrosphere, and solar system. This course focuses on the interactions between physical and chemical systems of the Earth such as the tectonic cycle, rock cycle, hydrologic cycle, weather, and climate.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

GEOL-141: Earth Science Laboratory
In this laboratory component of the GEOL 140 Earth Science lecture course, you will use hands-on, field-based, and in-class experiences to better understand and appreciate the geosphere, atmosphere, hydrosphere, and solar system. This course focuses on the physical and chemical systems of the Earth such as the tectonic cycle, rock cycle, hydrologic cycle, weather, and climate. This course is recommended for students concurrently enrolled in GEOL 140 or who have successfully completed the course within the last three years. Students should be prepared to participate in one or more off-campus field exercises.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite/Corequisite: GEOL 140.

Global Studies

GLST-101: Introduction to Global Studies
This course is an introduction to the interdisciplinary field of Global Studies, examining the history of globalization, and economic, political, social, cultural, and ecological processes related to globalization.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.

4730	70	3.00	Arranged	Online - Online	DE-LEC	ONCL	ONLN	Morcos,M

Note: The DE-LEC part of this class requires 6.75 hours per week of online instruction.
Note: 8 week class from 01/19/27 to 03/12/27.
Note: This is a fully online class. Students will be required to complete online instructional content via Canvas. This class could offer some live online meetings, but students will have options on accessing that content. Students should log on to Canvas the first day of class to access classes.

GLST-102: Global Issues
This course examines the origins, current status, and future trends of major transnational issues confronting the global community. Topics may include population trends, economic development and inequality, basic human needs and human rights, international conflict and security, competition over resources, movements for independence and social justice, environmental issues, and violence. This course focuses on global governance and collective global responsibility.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: GLST 101.

Health Education

HEALTH-100: Introduction to Public Health
This course introduces the environmental, biological, and socio-cultural determinants of public health. Emphasizes workplace, personal health, community and school healthcare policy, management, environmental and the health disparities among minorities. Focus on environmental health, chronic disease, global and public Health. Examines the qualitative and quantitative research methodologies for studying epidemiology. Analyze the multiple chronic diseases, addictions, psychiatric disorders, and the challenges local and global health in protecting our planet.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

HEALTH-103: Introduction to Holistic Health
This course explores health and healing practices involving theoretical, psychological, sociological, biological, historical, and cultural viewpoints. It delves into concepts and philosophies from traditional cultural healing systems and contemporary Western medicine through an interdisciplinary lens. The focus is on promoting health, preventing disease, and empowering individuals to advocate for their well-being with support from healthcare professionals. Topics encompass the history of Western medical practices, principles of indigenous healing systems, the influence of gender on healing, the impact of personality and emotions on health and disease, and the principles of integrative medicine.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

HEALTH-104: Women's Health
This course analyzes the biological, psychological, and sociological aspects of women's health, with special emphasis on women cross-culturally. Topics focus on current trends in the prevention of chronic diseases and illnesses, the promotion of positive body image, and self-empowerment of women. Students will also explore the application of the lifespan of lifestyle changes to develop strategies to become self-advocates in promoting one's own well-being.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

HEALTH-113: Social Determinants of Health, Disparities and Equities
This course will examine personal and social determinants of health through the examination of the role individuals play in their own health and wellbeing, along with the impact of environmental, social, structural, and cultural factors that play a role both in individual and community and public health. Health disparities and inequities in sexually diverse, gender, racial, and minority populations will be explored, and culturally competent ideas to bridge the health equity gap and improve population health will be developed.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

HIST-222: Independent Study in History
Students with previous coursework in history may do assigned projects involving research and analysis of selected topics. This independent study is for students who are interested in furthering their knowledge of history. Prior to registration, a written contract must be prepared jointly by the instructor and the student.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Repeatability: This course may be taken for a maximum of 3 units.

HUMSV-198C: Social Work and Human Services Fieldwork I
This course offers students supervised field experience in a community organization, agency, or institution, allowing the student to apply knowledge and learn new skills outside of the classroom environment. This course is designed to provide the student with an opportunity to observe, practice, and develop skills that would facilitate gaining employment in social work settings or human services fields.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite: HUMSV 170 and HUMSV 172 and HUMSV 173 and HUMSV 179.
Corequisite: HUMSV 195A.

Machinist Technology

MACH-021: Machine Shop
This course prepares students for entry into the machining industry. Students will explore career opportunities and requirements of a professional machinist. Content emphasizes beginning skills key to the success of working in the machining industry. Students study workplace safety and organization, job-related mathematics, basic blueprint information, basic measuring operations, benchwork skills, and the history of manufacturing.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Departmental Recommendation: MACH 090 and MACH 129.

			-M-W---	09:00A - 12:10P	LAB	AT	118	Ortiz,M

MACH-022: Machine Shop II
This course includes machine shop practices for students with a machining background. Emphasis is placed on mathematical speeds and feed formulas, boring processes on mills and lathes, tool grinding, National Institute for Metalworking Skills (NIMS) Standards. At the completion of this course, students will have completed certain NIMS certification competencies.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Departmental Recommendation: MACH 021.

MACH-070: Computer Numerical Control Programming (CNC)
This course focuses on basic numerical control programming and emphasizes math used for toolpath geometry, and the use of a computer CNC Software simulator for verifying toolpath geometry calculations.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Departmental Recommendation: TECALC 087 and MACH 090.

MACH-075: Computer Aided Design/Computer Aided Manufacturing Software
This course is an introductory, hands-on instruction of Computer Aided Design/Computer Aided Manufacturing (CAD/CAM) theory and study using Solidworks and Mastercam software. Emphasis is placed on generating programs to prepare CNC machine programs for applications involving two or more axes of control.
Credit Type: Earned units for this course are applicable to an Associate Degree.

MACH-090: Mechanical Print Reading
This course covers basic drafting and print standards, fundamentals of shape description, fundamentals of size description and annotation, industrial drawing types, and specialized parts and prints. The course content focuses on interpreting and applying geometric dimensioning and tolerancing (GDT) in machining through math formulas, tolerancing systems, modifiers, symbols, datums, and tolerances of form, profile, orientation, run-out and location. Students examine and interpret the generation of a working drawing, and how they are developed as a team effort between design, drafting, manufacturing and quality control.
Credit Type: Earned units for this course are applicable to an Associate Degree.

MACH-129: Manufacturing Processes
This course covers the basic manufacturing processes commonly used in the production of metal, plastic, wood, and composite parts. Emphasis is placed on forming, separating, fabricating, conditioning, and finishing processes related to each material. Process description, product/process characteristics are covered along with design and economic and environmental considerations. An overview of current automated manufacturing systems is presented.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: MACH 021.

Mathematics

MATH-102: College Algebra
This course is designed for students with a strong foundation in algebra. It includes the study of polynomial rational functions and inequalities, exponential and logarithmic functions, conics, systems of nonlinear equations and inequalities, and an introduction to sequences, series, and the Binomial Theorem.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: Eligibility for college level Mathematics based on the SBVC Guided-Self Placement process.

MATH-120: Mathematical Financial Planning
Learn the fundamentals of personal financial planning. This is a course designed to help students plan their financial life from student loans to retirement and investment strategies. Topics include credit management strategies, loan evaluation, buying and leasing automobiles, buying a house, investing and portfolios, insurance, taxes, and retirement planning. All topics developed through rigorous quantitative and mathematical applications in linear, algebraic, exponential, and logarithmic functions, sequences, series, and an introduction to portfolio risk analysis. Use of technology and financial calculators for financial planning.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: Eligibility for college level Mathematics based on the SBVC Guided-Self Placement process.

MATH-151: Precalculus
This course is designed for students preparing to take Calculus. It deepens students' understanding of algebra and trigonometry by building on topics from College Algebra and Plane Trigonometry, both of which are foundational for Calculus students. Topics include polynomials, rational, exponential, logarithmic, and trigonometric functions and their graphs, systems of linear and nonlinear equations and inequalities, partial fraction decomposition, parametric and polar equations, and an introduction to limits. (MATH 102 and MATH 151 combined: maximum UC transferable credit, one course.)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: College algebra or trigonometry or placement into precalculus based on the SBVC Guided-Self Placement process.

MATH-265: Linear Algebra
This course develops the techniques and theory needed to solve and classify systems of linear equations. Techniques that are covered include row operations, Gaussian elimination, and the algebra of matrices. The course explores the properties of vectors in n dimensions, which leads to the notion of an abstract vector space. The theory of vector spaces and matrices are introduced, and the topics include inner products, norms, orthogonality, eigenvalues, eigenspaces, and linear transformations. Applications of linear algebra are included.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: MATH C2210.

MATH-266: Ordinary Differential Equations
The course is an introduction to ordinary differential equations including both quantitative and qualitative methods as well as applications from a variety of disciplines. Introduces the theoretical aspects of differential equations, including establishing when solution(s) exist, and techniques for obtaining solutions, including, series solutions, and singular points, Laplace transforms and linear systems.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: MATH C2220.
Departmental Recommendation: MATH 252.

MATH-602: Support for College Algebra
This noncredit course is a review of the prerequisite skills essential for college algebra. This course includes a review of topics covered in elementary and intermediate algebra as appropriate, based on individual student needs. The course is intended for students who need to refresh their math skills while enrolled in a college algebra math course to be used for just in time remediation.
Credit Type: Noncredit course.
Grading Restriction: Graded on a Credit/No Credit basis only.
Corequisite: MATH 102.

MATH-C2210: Calculus I: Early Transcendentals
A first course in differential and integral calculus of a single variable. Topics include limits and continuity of functions, techniques and applications of differentiation, an introduction to integration, and the Fundamental Theorem of Calculus. This course is primarily intended for Science, Technology, Engineering, and Mathematics (STEM) majors. (Formerly MATH 250)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: Pre-calculus, or college algebra and trigonometry, or equivalent,or placement as determined by the college's multiple measures assessment process.
Formerly: MATH-250.

MATH-C2220: Calculus II: Early Transcendentals
A second course in differential and integral calculus of a single variable. Topics include applications of integration, techniques of integration, infinite sequences and series, and the calculus of parametric and polar equations. This course is primarily intended for Science, Technology, Engineering, and Mathematics (STEM) majors. (Formerly MATH 251)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: Calculus I: Early Transcendentals (MATH C2210), or equivalent, or placement as determined by the college's multiple measures assessment process.

Music (SBVC)

MUS-100: Music Appreciation
This course introduces students to music in western civilization and methods of music listening. Included in this course are guidelines for thoughtful music selection, basic musical forms, cross-cultural studies in music, music periods and styles, a discussion of patrons and audiences, careful consideration of the role of women in creating music, history of art music, popular music, world music, and jazz.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.
Alternate Listing: This course is also offered as MUS-100H.

MUS-100H: Music Appreciation - Honors
This course introduces students to music in western civilization and methods of music listening. Included in this course are guidelines for thoughtful music selection, basic musical forms, cross-cultural studies in music, music periods and styles, a discussion of patrons and audiences, careful consideration of the role of women in creating music, history of art music, popular music, world music, and jazz. This course is intended for students in the Honors Program, but is open to all students who desire more challenging course work.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.
Alternate Listing: This course is also offered as MUS-100.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.
5692	01	3.00	-M-W---	11:10A - 12:30P	LEC	VTBA	TBA	Pacier,P

MUS-101: Music Theory I: Fundamentals
This course studies music terminology, elements of music (pitch, duration, intensity, and timbre), rhythmic analysis, major scales and their key signatures, chromatic scales, intervals, and solfeggio syllables. It is a course designed for the beginning student with a moderate interest in the structure of music. It is also designed for the music major and as such serves as the first in a four-part series of music theory courses.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Corequisite: MUS 101L.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.
5694	01	3.00	--T-R--	09:35A - 10:50A	LEC	NH	217	Mahpar,S

MUS-101L: Musicianship I
Specifically, this course applies the materials studied in Music Theory I through sight-singing (using solfeggio syllables), keyboard skills (the playing of scales and identification of pitches on the

keyboard), recognition and performance of intervals, and some ear-training (melodic dictation). This course is the companion course to MUS 101.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Corequisite: MUS 101.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.
5696	01	1.00	--T-R--	11:00A - 12:20P	LAB	NH	217	Mahpar,S

MUS-102: Music Theory II: Scales and Modes
This course is a foundational discussion of analytical and compositional techniques through a progressive study of the following: four-part chorale composition (in diatonic harmony) including secondary dominants and other applied chordal structures; basic introduction into contrapuntal writing (two part only), voice leading, additional non-harmonic tones and modulation to relative, parallel and distant keys. It is the second in a four-part series of music theory courses designed for the music major.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisites: MUS 101 and MUS 101L.
Corequisite: MUS 102L.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.
5698	01	3.00	-M-W---	09:35A - 11:00A	LEC	NH	217	Mahpar,S

MUS-102L: Musicianship II
This course continues to focus on the study of musicianship through its components. It explores dictation skills (the notation of aural impressions), the continued use of solfeggio syllables to discern pitches within a tonal framework, keyboard fundamentals, and is designed to elevate the student's level of dictation and musical analysis. It is the companion course to MUS 102.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisites: MUS 101 and MUS 101L.
Corequisite: MUS 102.
Departmental Recommendation: MUS 134.

MUS-105: American Popular Music
This course traces the social history of America through a study of the eras of popular American music. By examining the various styles, the outstanding musicians and the leading composers exemplary of those styles, this class illustrates how the historical era impacts the music and how the music reflects the historical era. The course begins with a discussion of popular music examining the popular songs of the colonies and the schools of singing that developed. The discussion continues through the music of the Civil War and tracks popular music across the great westward expansion. It concludes with studies of Gospel, Blues, Jazz and ultimately Rock and Roll.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

MUS-107: Music Cultures of the World
This course is a survey of traditional and folk music of global continents and cultures. The course includes live and filmed performances, as well as introductions to various significant indigenous musical instruments. Students are introduced to instrumental and vocal techniques, musical structures, and performance contexts within selected cultures of the world. The impact and influence of global musical cultures on western music is a main focus in this course.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

MUS-108: History of Hip Hop Music
This course presents the development of Hip hop as a musical style and cultural movement. Students will examine key figures in Hip hop, institutions, and social settings through readings, electronic media, videos, and live performance. Students will also investigate how Hip hop culture is not only a source of entertainment, but also a medium that analyzes and/or provides commentary regarding social, economic, political, and cultural issues dealing with identity, cultural genocide, misogyny, racism, classism, materialism, freedom of speech, and sexuality.
Credit Type: Earned units for this course are applicable to an Associate Degree.

MUS-202: Music Theory IV: Harmony
The course is a conclusive study of diatonic harmonies, including further work with secondary dominant chord structures, and figured bass line realizations. It also includes an extensive study of ninth chords: complete, incomplete, and dominant ninth. A study of Neapolitan and augmented sixth chords, 9th, 11th, 13th chords as well as a study of 20th century techniques and Impressionism will be undertaken. The class will conclude its study of Bach chorales and other brief forms. This course is the fourth in a four-part series of theory courses designed for the music major and incorporates the concepts from MUS 201.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisites: MUS 201 and MUS 201L.
Corequisite: MUS 202L.

Nursing

NURS-140: Vocational to Professional Nurse
This course prepares Licensed Vocational Nurses (LVN) to transition into the Registered Nursing (RN) program. This is a first-year course that focuses on the nurse's role in the collection of assessment data, identifying the relevance of the data collected, the analysis of patient priorities, the implementation of nursing interventions, and evaluation of patient care for diverse adult patients. This course includes role transition content, nursing process, standards of practice, and critical thinking in nursing. In the degree option, challenge examinations covering first and second semester medical-surgical and maternity nursing content will determine eligibility for placement in the program. Application of KSAs will occur in the hospital, on-campus skills laboratory, and simulation settings.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Limitation on Enrollment: Registration is limited to students who have completed program prerequisites and have been accepted into the Nursing Program.

NURS-151: Introduction to Medical Surgical Nursing
This course is a first-year course that focuses on the nurse's role in the collection of assessment data, identifying the relevance of the data collected, the analysis of patient priorities, the implementation of nursing interventions, and the evaluation of patient care for diverse adults including adults ages 65 and over, nursing care and administration of medication for patients with the basic healthcare needs in pulmonary, musculoskeletal, cardiovascular, neurological, immunological, gastrointestinal, genitourinary, and endocrine body systems, as well as patients undergoing general surgery and/or requiring wound care. Application of KSAs will occur in the hospital, on-campus skills laboratory, and simulation settings.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite: NURS 140 or NURS 150.
Limitation on Enrollment: Registration is limited to students who have completed program prerequisites and have been accepted into the Nursing Program.

NURS-251: Intermediate Medical Surgical Nursing
This is a second-year course that focuses on the nurse's role in the collection of assessment data, identifying the relevance of the data collected, the analysis of patient priorities, the implementation of nursing interventions, and evaluation of patient care for diverse adult patients including adults aged 65 and over with selected healthcare needs in neurological, gastrointestinal, respiratory,

genitourinary, immunological, cardiovascular, and endocrine diseases. Application of KSAs will occur in the hospital, on-campus skills laboratory, and simulation settings.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite: NURS 140 or NURS 160 and NURS 161.
Limitation on Enrollment: Registration is limited to students who have completed program prerequisites and have been accepted into the Nursing Program.

NURS-261: Complex Care and Leadership
This is a second-year nursing course that builds upon previously learned knowledge, skills and attitudes while focusing on the application of the nursing process, discrimination of data, and identification of care priorities in order to manage complex needs of adults including adults ages 65 and over, critically ill or injured adults with single or multisystem failure. Complex Care and Leadership provides learning opportunities for leadership, community outreach, and disaster nursing. Correlated clinical experiences provide the senior student opportunities to assume nursing responsibilities in complex care areas and to function as part of an inter-professional team. Application of knowledge, skills, and attitudes (K-S-A) will occur in the hospital, on-campus skills laboratory, and simulation settings. The course also reviews graduate responsibilities for the National Council Licensure Examination (NCLEX) application and professional employment/licensure responsibilities.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.

Prerequisite: NURS 250 and NURS 251.
Limitation on Enrollment: Registration is limited to students who have completed program prerequisites and have been accepted into the Nursing Program.

NURS-601: Nursing Skills Lab
Students in this noncredit course receive support in developing and strengthening essential nursing skills across multiple content areas of the nursing program. Activities may include dosage

calculation practice, demonstration and practice of nursing skills and procedures required for program completion. Students will build competency in skills such as physical assessment, isolation procedures, oxygenation, wound care, urinary catheterization, medication administration, and other medical and surgical specialty skills.
Credit Type: Noncredit course.
Grading Restriction: Graded on a Credit/No Credit basis only.
Limitation on Enrollment: Enrollment in this course is limited to students who are currently enrolled in the SBVC Nursing Program.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.

Occupation Safety & Health Adm

OSHA-030: Federal OSHA Outreach: Construction Industry Safety
This course provides training required by the Occupational Safety and Health Administration (OSHA) for the Federal Outreach Construction Industry, minimum 30-Hour training card. Lessons emphasize hazard identification, avoidance, control and prevention of illness, injury, or death.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Departmental Recommendation: Federal OSHA requires each student be 18 years of age in order to qualify for an OSHA card.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.

Note: This is a synchronous course. Students registered in this course will be required to log in and be present for the days and times listed. You will be live online with the instructor for all class meetings.

OSHA-035: Federal OSHA Outreach: General Industry Safety
This course provides outreach training and gives general industry workers information about rights, employer responsibilities, how to identify, abate, avoid and prevent job- related hazards on a job site. Lessons will emphasize hazard identification, avoidance, control and prevention of illness, injury, or death. Successful completion may qualify students for the Federal OSHA minimum 30-hour General Industry card.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Departmental Recommendation: Federal OSHA requires each student be 18 years of age in order to qualify for an OSHA card.

Students will be required to complete online instructional content via Canvas. This class could offer some live online meetings, but students will have options on accessing that content. Students should log on to Canvas the first day of class to access classes. Canvas Log In Page

Oceanography

OCEAN-101: Elements of Oceanography
This course explores the geological processes that created the ocean basins, chemistry of sea water, physical motions of the oceans, and the interrelationships of biological communities with their physical environments. Oceanographers and related scientists from traditionally underrepresented groups are featured throughout this course. Environmental issues and environmental justice movements associated with the world's oceans fundamentally inform this course. Geospatial analysis of world oceans, including Geographic Information Systems (GIS) and remote sensing, is an integral component of this course. It is recommended that transfer students also enroll in the companion OCEAN 111, Elements of Oceanography Laboratory.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: MATH 102 or higher and ENGL 1000 or ENGL C1000H.

OCEAN-111: Elements of Oceanography Laboratory
This hands-on course introduces students to techniques of oceanography, including bathymetry, charts, and methods of studying the physical ocean environment. Oceanographers and related scientists from traditionally underrepresented groups are featured throughout this course. Environmental issue and environmental justice movements associated with the world's oceans fundamentally inform this course. This course is recommended for students concurrently enrolled in OCEAN 101 or who have successfully completed the course within the last three years.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite/Corequisite: OCEAN 101.

Pharmacy Technology

PHT-060: Pharmacy System I
This class introduces the student to the field of pharmacy, its history, environment, and processes. It emphasizes out-patient/community service pharmacy settings in issues of prescription processing, pharmacy business management, federal laws/regulation, protocol procedures, and pharmacy references/associations for assistance.
Credit Type: Earned units for this course are applicable to an Associate Degree.

PHT-062: Pharmacology I
This course introduces the basic pharmacology principles of pharmacokinetics and pharmacodynamics as it applies the therapeutic uses of medications being administered to the human body systems. The student will identify the medication's classifications, emphasizing basic indications, drug dosages, dosage forms, routes of administration, side effects, special directions of use, and drug interactions with other medications, foods, and/or nutrient supplements.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Departmental Recommendation: BIOL 205 or CHEM 101.

Physics

PHYSIC-101: Introductory Physics
This introductory, algebra-based, physics course is an exploration of the physical principles ranging from classical mechanics to modern physics, which shape our lives. Students will be better equipped to make connections between the concepts of physics and their everyday world. This class includes a hands-on laboratory to bridge the connection between theory and everyday life. This course also explores the connections between physics and other fields of science, technology, and society.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: Eligibility for college level English and Mathematics based on the SBVC Guided-Self Placement process.

PHYSIC-151: General Physics for the Life Sciences I
This is the first course in a two-semester physics sequence designed primarily for students in biology, pharmacology, pre-medicine, physical therapy, and allied health programs. Topics include mechanics, waves, fluids, and thermodynamics. The needed concepts of calculus will be developed and used where appropriate.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisites: MATH 103 or eligibility for MATH 151 or higher based on the SBVC Guided-Self Placement process and eligibility for college level English based on the SBVC Guided-Self Placement process.
Departmental Recommendation: PHYSIC 101.

Police Science

POLICE-002: Basic Law Enforcement Academy
Basic training for new law enforcement officers. This course covers but is not limited to: leadership, professionalism and ethics, criminal justice system, juvenile law, patrol procedures, domestic violence, traffic enforcement, lifetime fitness, defensive tactics, first aid and CPR, and firearms.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Departmental Recommendation: POLICE 001 and ENGL C1000 or ENGL C1000H.
Corequisite: POLICE 100 and POLICE 101 and POLICE 102 and POLICE 103.
Limitation on Enrollment: Enrollment is limited to those students who meet state screening requirements as outlined in the Government Code, California Penal Code and the Commission on Peace Officer Standards and Training Administrative Manual.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.

6089	01	26.00	Arranged	325 - total hrs	LEC	SBSD	TRAIN	Dennis,P
			Arranged	444 - total hrs	LAB	SBSD	TRAIN	Dennis,P

Note: 24 week class from 03/22/27 to 09/02/27.

POLICE-100: Criminal Law
This course analyses property crimes, crimes against persons, crimes against children, child abuse reporting, sex crimes, crimes against the judicial system, weapons violations, relevant laws and court decisions and crimes against the public peace. This course will focus on the relationship between criminal law and the criminal justice system. Classification of crimes and their application to the criminal justice system will also be covered in the course.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Corequisite: POLICE 002 and POLICE 101 and POLICE 102 and POLICE 103.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.
Limitation on Enrollment: This course is limited to students.
Who Have Successfully Met State Screening Requirements: possession of a California driver's license without restrictions, other than required eyeglasses or contact lenses and possession of a current letter of clearance issued by the California Department of Justice that certifies the right to be in possession of a firearm.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.

Political Science

POLS-103: Native American Politics and Policy
This course provides an introduction to Native American Politics and policy. It will examine the relationship of Native Americans to the U.S. political system from the colonial era to contemporary period. It includes analysis of Native American political structures and functions, Federal Indian policy, the relationship between tribes and states, and important issues affecting the American Indian community. This course will focus on U.S. and California Indian history, emphasizing several key issues in modern Indigenous politics. It will also focus on the treaty making process that formed the foundation of contemporary tribal sovereignty to legal cases and precedents that impact Native American lands and people. The course will also explore how Native People have both petitioned for access into the American polity and actively resisted assimilation.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

Prerequisite: ENGL C1000 or ENGL C1000H.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.
6088	70	3.00	Arranged	Online - Online	DE-LEC	ONCL	ONLN	Henkle,L

Note: The DE-LEC part of this class requires 6.75 hours per week of online instruction.
Note: 8 week class from 03/22/27 to 05/13/27.
Note: This is a fully online class. Students will be required to complete online instructional content via Canvas. This class could offer some live online meetings, but students will have options on accessing that content. Students should log on to Canvas the first day of class to access classes.

POLS-110: Introduction to Political Theory
This course is a survey of Western political thought from classical times to the contemporary period. The course explores such controversial topics as the nature of justice, the morality of political deception and violence, the proper limits of governmental power, the virtues (and challenges) of political diversity, and the future of the bourgeois state in an era of globalization. (Formerly POLIT 110)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.

POLS-110H: Introduction to Political Theory - Honors
This course is a survey of Western political thought from classical times to the contemporary period. The course utilizes selected primary texts to explore such controversial topics as the nature of justice, the morality of political deception and violence, the proper limits of governmental power, the virtues (and challenges) of political diversity, and the future of the bourgeois state in an era of globalization. This course is intended for students in the Honors Program but is open to all students who desire more challenging course work. (Formerly POLIT 110H)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.

POLS-150: Introduction to Public Policy
This course is an introduction to public policy. It introduces the basic concepts and processes underlying policy analysis, including application of these concepts to economic and budgetary policy, health care policy, welfare and social security policy, education policy, and environmental and energy policy, and social and cultural policies. It covers the actors involved in the policy process such as institutions, congress, the executive branch, and groups. It also addresses the theories involved in the policy process as well as the environment in which policy is made in the United States. (Formerly POLIT 150)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.
Formerly: POLIT-150.

Psychology

PSYC-102: Personal and Social Adjustment
This course provides students with an applied focus on how psychology is used in everyday life and is related to other social sciences. This course examines a variety of psychological and theoretical

perspectives and how these ideas are applied across a person's life taking into account the influence of factors such as culture, gender, ethnicity, historical cohort, and socio-economic status. A broad understanding of how scientists, clinicians, and practitioners study and apply psychology is emphasized. (Formerly PSYCH 102)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: PSYC C1000 or PSYC C1000H.
Departmental Recommendation: READ 100.
Formerly: PSYCH-102.

PSYC-141: Introduction to Biological Psychology
This course will introduce the scientific study of the biological bases of behavior and the role of the scientific method in neuroscience. Topics will include basic neuroanatomy and neurophysiology, nervous system structure and functions, hormonal and neurochemical mechanisms, brain-behavior relationships underlying movement, sensation, perception, learning, memory, consciousness,

emotion, regulatory processes, and psychological disorders. Historical scientific contributions and current research principles for studying brain-behavior relationships and mental processes will be addressed in this course. Ethical standards for human and animal research will be discussed in the context of both invasive and non-invasive experimental research. (PSYCH 141)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: PSYC C1000 or PSYC C1000H.
Departmental Recommendation: READ 100.

Reading and Literacy

READ-015: Preparation for College Reading
Have you seen the movies IT or Doctor Sleep? They are based on Stephen King novels. How about The Hate U Give, Crazy Rich Asians, or Jurassic Park? These movies were also book-to-movie adaptations. If you're a fan of movies, read the books that inspired them! This course is designed to foster improvement in reading comprehension and vocabulary. Coursework includes reading texts from various genres and other assignments, while preparing students for college reading success across the disciplines. This course may also be offered for noncredit as READ 615.
Credit Type: Earned units for this course are applicable to an Associate Degree.

SOCI-141H: Race and Ethnic Relations - Honors
This course is a sociological and interdisciplinary examination of racial and ethnic groups in American society. Topics include historical and contemporary events and practices that have institutionalized racism including the social struggles of the four racialized core groups, with a focus on introductory concepts of ethnic studies, intersectionality, and anti-racist approaches toward social justice and equity. This course is intended for students in the Honors Program but is open to all students who desire more challenging course work. This course is also offered as ETHS 141H. (Formerly SOCI 141H)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: ENGL C1000 or ENGL C1000H.
Alternate Listing: This course is also offered as ETHS-141H, ETHS-141, SOCI-141.

SOCI-602: Compassion, Connection, and Belonging
This noncredit course introduces compassion-based mindfulness for personal well-being and workplace readiness. Compassion practices have been shown to lower anxiety, improve resilience, and strengthen connection and belonging. Included in this course are core compassion practices including self-compassion, gratitude, equanimity, and loving kindness, along with an exploration of compassion tools within the social context of workplace and organizational environments and interactions. You are invited to engage with these tools at a pace that feels safe. Whether you're preparing for a career in healthcare, education, social work, or any people-centered path, this course offers valuable soft skills you can include on your resume and California's Digital Career Passport. Completion of SOC 601 and SOC 602 are required to earn the Certificate in Mindfulness for Work and Community.
Credit Type: Noncredit course.
Grading Restriction: Graded on a Credit/No Credit basis only.

SOCI-C1000: Introduction to Sociology
This course introduces students to Sociology: the study of people, groups, and institutions that shape people's lives. Through a mix of theory, research, and real-world examples, students explore key sociological concepts like culture, inequality, power, collective action, and social change. With

content reflecting diverse histories and lived experiences, students make connections between their lives and the social forces that influence individual opportunities and choices. Students in this course will develop a critical lens that allows them to better understand and transform themselves and society. (Formerly SOC 100)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: READ 100 or ENGL C1000 or ENGL C1000H.

SPAN-101H: College Spanish I - Honors
In this course students will develop the ability to converse, read, and write in Spanish at a basic level. The course includes the study of essentials of pronunciation, vocabulary, idioms and grammatical structures along with an introduction to the cultures of Spanish speaking countries. This course corresponds to the first two years of high school study. This course is intended for students in the Honors Program, but it is open to all students who desire more challenging course work.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: ENGL C1000 or ENGL C1000H.
Alternate Listing: This course is also offered as SPAN-101.

SPAN-157: Spanish for Heritage Speakers I
This course is intended for students with native or near-native proficiency in spoken Spanish. Reading and writing standard literary Spanish is emphasized. Students will develop an increased understanding of academic vocabulary, grammar, orthography, and punctuation. Oral proficiency will also be strengthened. Analyzing and discussing topical, cultural and historically-significant texts will allow students to increase cultural awareness of the Spanish-speaking world and to sharpen critical thinking skills. The course is conducted in Spanish.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.

Statistics

STAT-608: Support for Introduction to Statistics
This noncredit course is a review of the prerequisite skills essential for statistics. This course includes a review of topics covered in arithmetic and algebra as appropriate, based on individual student needs. The course is intended for students who need to refresh their math skills while enrolled in an introductory statistics course to be used for just in time remediation. (Formerly MATH 608)
Credit Type: Noncredit course.

Grading Restriction: Graded on a Credit/No Credit basis only.
Corequisite: STAT C1000.
Formerly: MATH-608.

STAT-C1000: Introduction to Statistics
This course is an introduction to statistical thinking and processes, including methods and concepts for discovery and decision-making using data. Topics include descriptive statistics; probability and sampling distributions; statistical inference; correlation and linear regression; analysis of variance, chi-squared, and t-tests; and application of technology for statistical analysis including the interpretation of the relevance of the statistical findings. Students apply methods and processes to applications using data from a broad range of disciplines. (Formerly MATH 108)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: Placement as determined by the college's multiple measures assessment process or completion of a course taught at or above the level of intermediate algebra.
Alternate Listing: This course is also offered as STAT-C1000H.

STAT-C1000H: Introduction to Statistics - Honors
This course is an introduction to statistical thinking and processes, including methods and concepts for discovery and decision-making using data. Topics include descriptive statistics; probability and sampling distributions; statistical inference; correlation and linear regression; analysis of variance, chi-squared, and t-tests; and application of technology for statistical analysis including the interpretation of the relevance of the statistical findings. Students apply methods and processes to applications using data from a broad range of disciplines. (Formerly MATH 108)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Prerequisite: Placement as determined by the college's multiple measures assessment process or completion of a course taught at or above the level of intermediate algebra.
Alternate Listing: This course is also offered as STAT-C1000.

SDEV-102: Pathways for College and Life Success
This introductory course is designed for students seeking direction in setting academic and life goals. A bio-psycho-social perspective will be used to highlight the person-environment dynamics crucial to a well-rounded preparation for academic and life success. Major topics will include evaluation of personal interests, abilities and values, educational planning, goal setting, and academic success strategies.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Departmental Recommendation: READ 100.

Technical Calculations

TECALC-087: Technical Calculations
This course covers practical use and applications of technical calculations most commonly utilized in the trades and industry. Topics include electrical measurements, temperature, volume, weight, and positioning including the number line, working with dedicated formula, applied problems, geometric principles, graphs, right triangles, coordinate systems, and scientific and engineering notation. Concepts, techniques and applications of arithmetic and elementary algebra emphasizing applications to practical problems. Interactive and traditional problem solving methods. Class interactive group exercises applying mathematical techniques to various applications and real world problems. A course in mathematical problems is frequently used by students enrolled in the trades and industrial and engineering programs. Problems are drawn from the industrial field.
Credit Type: Earned units for this course are applicable to an Associate Degree.

Theatre Arts

THART-100: Introduction to the Theatre
This course focuses on the relationship of theatre to various cultures throughout history, and on the contributions of significant individual artists. This course introduces students to elements of the production process including playwriting, acting, directing, design, and criticism. Students will also survey different periods, styles, and genres of theatre through play reading, discussion, films, and viewing and critiquing live theatre, including required attendance of theatre productions.
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to both CSU and UC.
Alternate Listing: This course is also offered as THART-100H.

Water Resources Management

WRM-301: California Water History
This course provides water technology students with a practical study of the history of water resources management, focusing on regulatory and reliability requirements that meet diverse customer, public health, ecological, and economic needs. Key topics include wetlands, dams, aqueducts, and the impact of land ownership on urban and rural communities in California. A strong emphasis will be placed on diversity, equity, and inclusion, ensuring that the perspectives of various communities are represented and valued in discussions about water resources. Current water industry best practices, relevant case studies, and the politics of water will be discussed and demonstrated throughout the course. Additionally, new and emerging technologies will be examined for producing "fit for purpose" water, highlighting innovative solutions that promote equitable access and sustainability for all communities. (Bachelor Degree Applicable)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Limitation on Enrollment: Associate degree in Water Technology or an equivalent field, along with acceptance into the Bachelor of Science program in Water Resources Management.

Note: The DE-LEC part of this class requires 6.75 hours per week of online instruction.
Note: 8 week class from 01/19/27 to 03/12/27.
Note: This is a fully online class. Students will be required to complete online instructional content via Canvas. This class could offer some live online meetings, but students will have options on accessing that content. Students should log on to Canvas the first day of class to access classes.Credit Type: Earned units for this course are applicable to a Bachelor's Degree Transferability: Course credit transfers to CSU. Limitation on Enrollment: Associate degree in Water Technology or an equivalent field, along with acceptance into the Bachelor of Science Program in Water Resources Management.

WRM-302: Introduction to Water Resources Management
This course offers an overview of water resources management principles, focusing on sustainable use, ethical considerations, and the intersection of policy and economics. It examines California's

water resources through the lens of diversity, equity, and inclusion, addressing how water usage impacts marginalized communities. Key topics include water quality, pollution, regulations affecting public drinking water, watershed management, and hydrology. The course also explores alternative water sources and conservation methods that promote sustainability and social justice. By emphasizing diverse voices, students will gain the knowledge and skills to advocate for inclusive solutions in water resources management. (Bachelor Degree Applicable)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite: WRM 301.
Limitation on Enrollment: Associate degree in Water Technology or an equivalent field, along with acceptance into the Bachelor of Science program in Water Resources Management.

WRM-310: Applied and Professional Ethics in the Water Sector
This course examines the intersection of effective leadership and ethical decision-making in the water utility sector, with a focus on diversity, equity, inclusion, and anti-racism. Students will explore transformative leadership qualities and the challenges of fostering equitable community engagement. The course emphasizes proactive engagement with diverse stakeholders, recognizing the importance of inclusive dialogue in addressing ethical complexities in water management. Through the analysis of real-world dilemmas, students will develop analytical skills, and a values framework centered on justice and sustainability. By the end of the course, participants will be equipped to navigate the ethical landscape of the water sector, advocate for marginalized voices, and implement solutions that promote social responsibility and equity. (Bachelor Degree Applicable)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite: WRM 302.
Limitation on Enrollment: Associate degree in Water Technology or an equivalent field, along with acceptance into the Bachelor of Science program in Water Resources Management.

WRM-315: Technology and Public Administration

This course explores managerial aspects of technology in relation to Information security and governance focused on WRM, and diversity, equity, and inclusion. Students will examine the challenges of IT and operational technology (OT) networks, particularly under the legal framework of America's Water Infrastructure Act (AWIA), and learn to identify vulnerabilities, plan cybersecurity policies, and assess risks related to water quantity, quality, regulations, and public trust. The course also emphasizes the role of cybersecurity in protecting data, safeguarding infrastructure, and ensuring equitable access to reliable water services. Students will develop formal cybersecurity policies, acceptable use policies for sustainable water resources management, and security awareness training tailored to water utility organizations. By integrating principles of anti-racism, students will analyze the intersection of water policy, technology, and environmental indicators to promote equitable outcomes and inclusive practices in water resources management. (Bachelor Degree Applicable)

Credit Type: Earned units for this course are applicable to an Associate Degree.

Transferability: Course credit transfers to CSU.

Prerequisite: WRM 302.

Limitation on Enrollment: Associate degree in Water Technology or an equivalent field, along with acceptance into the Bachelor of Science program in Water Resources Management.

WRM-330: Water Law

This course provides a comprehensive overview of water law in the United States, examining the legal frameworks surrounding water ownership, rights, and management. Students will explore historical and contemporary conflicts involving American Indian tribes and state governments, focusing on groundwater-surface water interactions. Key topics include the evolution of water rights,

the Public Trust Doctrine, and landmark cases such as Irwin v. Phillips and Arizona v. California. The course addresses issues of water scarcity, management strategies, and the impact of environmental laws like the Endangered Species Act. Through case studies and legal analysis, students will develop critical thinking skills and gain a thorough understanding of the legal, economic, and environmental aspects of water resources management, preparing them for careers in law, policy, and environment. (Bachelor Degree Applicable)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: WRM 301.
Limitation on Enrollment: Associate degree in Water Technology or an equivalent field, along with acceptance into the Bachelor of Science program in Water Resources Management.

Water Supply Technology

WST-100: Water Technology Math
This vocational math course is designed for students enrolled in water technology programs, combining essential math applications with technical skills for water and wastewater operators. Students will solve real-world problems in water management while exploring how equitable and sustainable solutions can address systemic disparities in water access and quality. Emphasizing diversity, equity, and inclusion, the course integrates technical training with discussions on social justice and anti-racism in water systems. Students will leave with the math, technical, and critical thinking skills needed to promote equity and sustainability in their future careers. (Formerly WST 052)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Formerly: WST-052.

WST-110: Wastewater Treatment I

This course provides a comprehensive introduction to wastewater treatment, highlighting the significance of diversity, equity, and inclusion in environmental management. Students will explore the scope, methods, and limitations of wastewater treatment processes. Designed for individuals from all backgrounds-whether seeking employment or currently in the field-the course covers essential knowledge for achieving competency as a Grade I or Grade II Wastewater Treatment Plant Operator, as defined by the State Water Resources Control Board (SWRCB). It also addresses how systemic inequalities affect access to clean water and sanitation. Students will gain technical expertise while understanding the role of inclusive practices in fostering effective environmental solutions. (Formerly WST 091)

Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: WST 101.

WST-111: Wastewater Collection I

This course is designed to train operators in the practical aspects of operating and maintaining wastewater collection systems, with a strong emphasis on safe practices and procedures. Students will acquire the technical skills necessary for the essential duties of an entry-level collection system maintenance technologist, including system monitoring, troubleshooting, and maintenance techniques. In addition to technical training, the course integrates principles of diversity, equity, inclusion, and anti-racism. Students will explore how these concepts impact wastewater management practices and community access to services. Discussions will focus on the importance of cultural competence and the role of wastewater professionals in advocating for equitable solutions in diverse communities. By the end of the course, students will be well-prepared to take the

California Water Environment Association (CWEA) Collection System Certification exam at the Grade I level, equipped with both the technical knowledge and the awareness needed to foster inclusive practices in their future careers.(Formerly WST 081)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: WST 101.
Formerly: WST-081.

WST-130: Water Distribution Operator I
This course provides a comprehensive overview of the configuration, operation, and maintenance of water distribution systems. Students will also delve into the Expected Range of Knowledge (ERK) necessary for the State Water Resource Control Board (SWRCB) water distribution certification examinations at the D1 and D2 levels. Successful completion of this course equips students with the requisite skills and knowledge to meet the specialized training requirements essential for the SWRCB D2 certification test. Through a blend of theoretical learning and practical applications, students will gain a deep understanding of the fundamental principles of water supply, preparing them for a successful career in water distribution management. (Formerly WST 061)

WST-131: Water Use Efficiency Practitioner I
This introductory course on water conservation is designed for students from diverse backgrounds who aspire to become effective water use efficiency practitioners. Recognizing the critical importance of sustainable water management in an increasingly diverse society, this course emphasizes the need for inclusive practices that address the unique challenges faced by various communities. Throughout the course, students will explore foundational concepts of water use

efficiency, including the principles and practices necessary for achieving the American Water Works Association (AWWA) Water Use Efficiency Practitioner I Certificate. In addition, we will examine how social equity, environmental justice, and anti-racism intersect with water resource management. Students will engage in discussions and projects that highlight the disparities in water access and quality among different demographic groups, fostering a deeper understanding of the role that practitioners play in promoting equitable water solutions. (Formerly WST 031)
Credit Type: Earned units for this course are applicable to an Associate Degree.

WST-137: Environmental Laws and Regulations
This course offers a comprehensive overview of federal, state, and local laws and regulations focused on environmental protection and pollution prevention, emphasizing the importance of diversity, equity, inclusion, and anti-racism. Students will explore how political, economic, scientific, and health factors shape regulatory policies aimed at safeguarding water resources, with particular attention to the impact these policies have on historically marginalized communities. The course will examine environmental monitoring standards, regulatory agencies, and inter-agency relationships, highlighting how these frameworks can perpetuate or challenge systemic inequities. Through critical analysis and discussion, students will gain insights into the necessity of inclusive and equitable approaches in environmental governance, preparing them to advocate for policies that benefit all communities. This course offers a comprehensive examination of federal, state, and local laws and regulations focused on environmental protection and pollution prevention. Recognizing the interconnectedness of politics, economics, science, health, and social justice, the course critically analyzes how these elements influence regulatory policies designed to safeguard and protect water resources. Through a lens of diversity, equity, inclusion, and anti-racism, students will explore environmental monitoring standards, regulatory agencies, and inter-agency relationships, emphasizing the importance of equitable environmental practices that serve all communities, especially those historically marginalized. WST-140: Water Distribution Operator II

This advanced course prepares students for journeyman-level operations in water distribution, focusing on the Expected Range of Knowledge (ERK) for the California State Water Resources Control Board (SWRCB) examinations for Water Distribution Operator IV (D4) and V (D5) certifications. Incorporating principles of diversity, equity, inclusion, and anti-racism, the curriculum addresses how systemic inequities affect water access and quality. Students will learn to advocate for inclusive practices within the industry. Successful completion fulfills the specialized training requirements for SWRCB Water Treatment Operator III (T3) and Water Distribution Operator IV (D4) certifications, equipping students to lead with a commitment to social responsibility in their careers.(Formerly WST 062)

WST-145: Backflow Prevention Devices

This course provides essential instruction in the theory, testing, and maintenance of backflow prevention assemblies for journeyman plumbers and utility operators. Students will master technical skills while examining the critical role these devices play in protecting public health and water quality, especially in diverse and underserved communities. The curriculum emphasizes inclusive practices in backflow prevention, highlighting that equitable access to safe drinking water is a fundamental human right. Students will learn to identify cross-connection threats and understand their implications for various populations, addressing systemic inequities in water safety. Participants will also prepare for the American Water Works Association Backflow Prevention Certification test, ensuring they are technically proficient and informed advocates for diversity, equity, and inclusion in their field. By the end of the course, students will be ready to implement backflow prevention measures that promote safety and social justice within the water industry. (Formerly WST 045)

WST-150: Water Treatment I
This comprehensive introductory course is designed for students interested in the vital and dynamic field of water treatment, with a strong emphasis on environmental stewardship. As we navigate the complexities of water treatment processes, students will gain a thorough understanding of how to transform source water into safe, potable water while critically examining the social and environmental contexts that shape water access and quality across different communities. The course covers the essential processes required for effective water treatment, including filtration, disinfection, as well as the regulatory frameworks that govern these practices. Central to this course is the Expected Range of Knowledge (ERK) required to successfully pass the California State Water Resource Control Board (SWRCB) examination for Water Treatment Operator I (T1) and Water Treatment Operator II (T2) levels. Students will engage in hands-on learning experiences and case studies that not only reinforce technical skills but also highlight the importance of culturally responsive practices in water management. Successful completion of this course will fulfill the requirements for the specialized training necessary to apply for the SWRCB T2 certification test, empowering students to become change-makers in the field of water treatment and beyond. (Formerly WST 071)
Credit Type: Earned units for this course are applicable to an Associate Degree.

WST-186: Electrical Instrumentation for Water and Wastewater Operations

This course addresses the essential electrical instrumentation needs of the water and wastewater industry, focusing on remote monitoring and inclusive practices. Students will learn about electronic, electrical, and control systems for measuring pressure, temperature, level, and flow, while developing skills in sensors, measurement techniques, data analysis, and troubleshooting. The course will also examine electrical safety, process and instrumentation diagrams (P&ID), and automation tools, highlighting their role in promoting equitable access to clean water. By fostering an understanding of these concepts within diverse contexts, students will be prepared to optimize operations and advocate for sustainable practices in the industry. Graduates will enhance their value and versatility in the job market while contributing positively to all communities. (Formerly WST 086)

Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: WST 110 and WST 150.

Formerly: WST-086.

Note: 8 week class from 03/25/27 to 05/13/27.
Note: This is a HYBRID class. This means that there are both on-campus and online Internet activities required. To participate in this class you must attend all scheduled on-campus classes and have access to a computer that has a reliable internet connection. Students should access http://online.valleycollege.edu during the week prior to the semester start date. All information regarding this class, including course-specific technology requirements, will be found on that webpage. The course may not be accessible to students until the first day of the class.

WST-188: Pumps and Motors
This course is designed to engage students with the fundamental principles of mechanical equipment, specifically pumps and motors, while incorporating the technical skills essential for maintenance personnel in water operations. Through a lens of diversity, equity, and inclusion, we will explore the installation, operation, maintenance, and repair of mechanical systems, emphasizing the importance of diverse perspectives in engineering practices. Students will gain a comprehensive understanding of preventive, predictive, and proactive maintenance techniques critical to water operations, including equipment monitoring, lubrication analysis, machine alignment, balancing, and scheduled periodic maintenance and overhaul. We will examine how diverse teams and inclusive practices lead to innovative solutions and enhanced safety standards in mechanical maintenance, particularly in the context of water systems. By fostering an environment where all voices are valued, this course aims to prepare students to excel in both technical skills and their understanding of equity and anti-racism in the engineering field. We will encourage a collaborative approach to problem-solving that respects and uplifts all individuals, recognizing the vital role that diverse perspectives play in advancing the effectiveness and sustainability of water operations. (Formerly WST 088)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Departmental Recommendation: WST 100 or WST 101.
Formerly: WST-088.

WST-275: Water/Wastewater Chemistry and Analysis
This course explores the physical and chemical properties of substances used in water and wastewater treatment, emphasizing equitable access to clean water for all communities. Students will learn laboratory analysis techniques critical to treatment processes while examining the social contexts and systemic inequities that impact marginalized populations. By highlighting diverse perspectives and fostering a collaborative learning environment, the course prepares students to address water quality issues with a commitment to social responsibility, sustainability, and anti-racism in water management practices. (Formerly WST 075)
Credit Type: Earned units for this course are applicable to an Associate Degree.
Transferability: Course credit transfers to CSU.
Prerequisite/Corequisite: WST 110 or WST 150.
Formerly: WST-075.

WELD-666: Preparation for Los Angeles City Welding Certification - Structural (AWS D1.1)
This noncredit course prepares students for the written Structural Steel examination offered by the City of Los Angeles Department of Building and Safety (LADBS) with a focus on the American Welding Society (AWS) D1.1 structural welding code.
Credit Type: Noncredit course.

WELD-680: Gas Metal Arc Welding - Beginning
This noncredit course introduces Gas Metal Arc Welding (GMAW) techniques, including short-circuit and spray transfer methods. Students practice welding in multiple positions on various thicknesses of mild steel. Emphasis is placed on developing proper welding technique and equipment operation.
Credit Type: Noncredit course.

WELD-681: Gas Metal Arc Welding - Intermediate
This noncredit course is the study of intermediate techniques and methods of Gas Metal Arc Welding (GMAW) and Metal-Cored Arc Welding (MCAW) in all positions and on various thicknesses of mild steel and aluminum.
Credit Type: Noncredit course.
Prerequisite: WELD 680.

WELD-690: Flux Cored Arc Welding - Gas Shielded
This noncredit course introduces techniques and methods of Flux Cored Arc Welding- Gas shielded (FCAW-G) in all positions and on various thicknesses of carbon steel.
Credit Type: Noncredit course.

Ref#	Sec	Units	Days	Time	Type	Build	Rm.	Inst.

			----R--	05:00P - 10:05P	LAB	VTBA	TBA	Staff

WELD-691: Flux Cored Arc Welding - Self Shielded
This noncredit course introduces techniques and methods of Flux Cored Arc Welding- Self shielded (FCAW-S) in all positions and on various thicknesses of carbon steel.
Credit Type: Noncredit course.
Grading Restriction: Graded on a Credit/No Credit basis only.

Departmental Recommendation: WELD 690.
